Discours De La Mthode:

Discours de la méthode René Descartes, 1861 **Discours de la méthode** Descartes, René, 2017-02-03 Le Discours de la méthode sous titre Pour bien conduire sa raison et chercher la vérité dans les sciences est un texte philosophique publié anonymement par René Descartes le 8 juin 1637 Dans les premières éditions ce discours servait d'introduction à trois traités scientifiques mettant en application cette méthode La Dioptrique Les Méthodes et La Géométrie Pour Descartes il s'agit d'en dire assez pour faire juger que les nouvelles opinions qui se verraient dans la Dioptrique et dans les Méthodes n'étaient point contraires à la religion 1 Toutefois sa clarté est devenue telle qu'il est désormais souvent publié seul comme un essai indépendant Ce discours marque une rupture avec la tradition scolastique jugée trop spéculative par Descartes sixième partie et se présente plutôt comme un plaidoyer en faveur du progrès des techniques et pour une nouvelle fondation des sciences sur des bases plus solides Il fut rédigé directement en français langue vulgaire Descartes voulant par là s'opposer à la tradition scolastique qui avait pour habitude d'écrire en latin et s'adresser à un public plus large que les savants et les théologiens Il souhaitait être compris des femmes et des enfants 2 Dans ce discours Descartes expose son parcours intellectuel de façon rétrospective depuis son regard critique porté sur les enseignements qu'il avait reçus l'école jusqu'à la fondation d'une philosophie nouvelle quelques années plus tard Il y propose aussi une méthode composée de quatre règles pour éviter l'erreur et y développe une philosophie du doute visant à reconstruire le savoir sur des fondements certains en s'inspirant de la certitude exemplaire des mathématiques la célèbre phrase je pense donc je suis cogito ergo sum qui permet à Descartes de sortir du doute lui servira de titre de premier principe Par ailleurs il y résume ses méditations sur lui-même et sur Dieu dont il donne une version beaucoup plus tendue que dans les Méditations métaphysiques quatre ans plus tard Le Discours de la méthode est aussi l'occasion pour Descartes de présenter une morale provisoire tenant en quelques maximes de conduite rendues nécessaires par la méthode elle-même 3 et de développer des considérations sur les animaux théorie des animaux machines et sur le rôle du cœur dans la circulation du sang Enfin le traité présente des clarifications sur le rapport de l'homme à la nature représentatives de la modernité puisque Descartes y dit que les hommes doivent se rendre comme maîtres et possesseurs de la nature par le progrès des techniques au premier plan desquelles il recommande d'améliorer la médecine **Discours de la Méthode** R. de la méthode is a philosophical and autobiographical treatise published by René Descartes in 1637. Its full name is Discourse on the Method of Rightly Conducting One's Reason and of Seeking Truth in the Sciences. French title: Discours de la méthode pour bien conduire sa raison et chercher la vérité dans les sciences. The Discourse on The Method is best known as the source of the famous quotation "Je pense donc je suis" (I think therefore I am) which occurs in Part IV of the work. Good sense is of all things among men the most equally distributed for every one thinks himself so abundantly provided with it that those even who are the most difficult to satisfy in everything else do not usually desire a larger measure of this quality than they already possess. And in this it is not likely that all are mistaken: the conviction is rather to be held as testifying that the power of judging aright and of distinguishing truth from error which is properly what is called good sense or reason is by nature equal in all men and that the diversity of our opinions consequently does not arise from some being endowed with a larger share of reason than others but solely from this that we conduct our thoughts along different ways and do not fix our attention on the same objects. For to be possessed of a vigorous mind is not enough: the prime requisite is rightly to apply it. The greatest minds as they are capable of the highest excellences are open likewise to the greatest aberrations and those who travel very slowly may yet make far greater progress provided they keep always to the straight road than those who while they run forsake it.
