**Language as Discourse** Michael McCarthy, Ronald Carter, 2014-07-22 In this book Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language In so doing the authors argue the need for language teachers syllabus planners and curriculum organisers to give greater attention to language as discourse Applied Linguistics and Language Teacher Education Nat Bartels, 2006-07-02 *Applied Linguistics and Language Teacher Education* is aimed at applied linguists who are interested in understanding more about the learning of novice teachers in their classes The 21 studies in this volume provide information on the complexity of novice teachers learning and use of knowledge in a variety of applied linguistics classes such as SLA Syntax Pragmatics Sociolinguistics Phonetics and Phonology L2 Reading and Writing Testing and Content Based Instruction These studies were conducted in a variety of contexts from North and South America to Europe Asia and Australia and look at the preparation of teachers of English Spanish and Chinese The book also includes a state of the art summary of research on knowledge acquisition and use which provides applied linguists with a solid basis for developing their ideas about their students learning and use of the knowledge presented in their classes Language Teacher Identities Matthew Clarke, 2008-06-06 Set in the rapidly changing world of the contemporary United Arab Emirates and bringing together detailed linguistic analysis with cutting edge social theory this book explores the development of the first cohort of students to complete a new Bachelor of Education in English language teaching theorizing the students learning to teach in terms of the discursive construction of a teaching identity within an evolving community of practice Both a study of the influence of issues such as gender and nationalism in language teacher education in the Middle East as well as of the power of discourse and community in shaping identity this book will be of relevance to anyone working in teacher education as well as to those with an interest in theorizations of discourse and identity **Discourse Analysis and Grammar** Michael McCarthy, **On Discourse Analysis in Classrooms** David Bloome, Stephanie Power Carter, Beth Morton Christian, Samara Madrid, Sheila Otto, Nora Stuart-Faris, Mandy Smith, 2008 This book in the NCRL Collection provides an introductory discussion of discourse analysis of language and literacy events in classrooms The authors introduce approaches

concludes by tying the practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms and an annotated further reading section. This book looks particularly at the relationship between language interaction and learning. Providing a comprehensive account of current perspectives on classroom discourse, the book aims to promote a fuller understanding of interaction regarded as being central to effective teaching and introduces the concept of classroom interactional competence (CIC). The case is made in this book for a need not only to describe classroom discourse but to ensure that teachers and learners develop the kind of interactional competence which will result in more engaged dynamic classrooms where learners are actively involved in the learning process. This approach makes an invaluable resource for language teachers as well as students of language and education and language acquisition within the field of applied linguistics.

*Discourse Perspectives on Second And/or Foreign Language Teaching and Learning* Dogan Yuksel, Banu Inan, 2013. Discourse can be understood as the sum of linguistic usages and metalinguistic manners about a social practice. It examines language in use with the help of the tools that would enable us to get a deeper understanding of what is said or unsaid. Analysis of discourse would help us understand social, cultural, psychological and academic dynamics that are interwoven in the utterances of interlocutors as they use language. This book covers a range of theoretical and applied studies on the examination of discourse in various second and foreign languages learning and teaching contexts. Basically, it includes studies that specifically focus on different aspects of discourse in the teaching of all four skills: reading, writing, listening and speaking. Three theoretical chapters on conducting discourse analysis research, the use of corpus linguistics and historical review of discourse analysis perspectives enrich the scope and content of the book. Researchers from different teaching and learning settings including Turkey, China and the USA contributed to this volume. The target audience of the book are undergraduate and graduate students in different foreign and second language departments and teachers, researchers and academicians of foreign and second languages. *Discourse Perspectives on Second and or Foreign Language Teaching and Learning* will facilitate the understanding of discourse by portraying empirical and theoretical studies on discourse. It covers quite different perspectives: eg sociocultural theory of mind perspective, critical discourse analysis and psychological and or mainstream perspectives of various topics in discourse: eg classroom interaction, written discourse, corpus linguistics, oral interviews, discourse of blogs, technology and discourse etc. The first three chapters provide a review of discourse and how it is conceptualised to various target groups of people: eg graduate students, teachers, researchers and academicians assuming no prior knowledge. The other chapters focus on different aspects of discourse both in and outside the classroom. This book provides teachers, learners and researchers of second and or foreign languages with the tools to analyse and or examine language inside and outside their classrooms.
