Discourse Function And Syntactic Form In Natural Language Generation:

Discourse Function & Syntactic Form in Natural Language Generation Cassandre Creswell, 2004-12-24 Interest in statistical natural language generation is rapidly increasing This work sheds important light from theoretical linguistics on the type of information crucial to statistical NLG algorithms **Structural Markedness and Syntactic Structure** Rodrigo Gutiérrez-Bravo, 2013-10-15 This book investigates a number of word order phenomena in Spanish concentrating on this language's unmarked word order and the perturbations of this order that result from topicalization and wh movement

The Syntax of Negation and the Licensing of Negative Polarity Items in Hindi Rajesh Kumar, 2013-10-15 This book studies syntax of NPIs and their interaction with sentential negatives in Hindi It outlines the clause structure of Hindi and locates the syntactic position of sentential negatives as well as constituent negatives within the structure It is argued that sentential negative in Hindi negation marker heads its own maximal projection NegP which is immediately dominated by TP In addition to locating the position of negation markers in the clause structure it outlines the distribution of negative polarity items NPIs in Hindi and the structural constraints on their licensing by sentential negative The book argues that an NPI in Hindi is licensed overtly in the course of derivation by a c commanding negative marker The bulk of the evidence presented in this book argues against previous theoretical accounts that claim that NPI licensing involves covert syntactic operations such as LF movement or reconstruction With respect to the classification of NPIs this book also shows the existence of two different types of NPIs in Hindi namely strong NPIs and weak NPIs Strong NPIs require a clause mate c commanding negative licensor whereas weak NPIs are quantifiers and are similar to free choice any in English that are interpreted as NPIs in the presence of a c commanding negative licensor *Challenging Change* Biljana Mišić Ilić, Vesna

Lopičić, 2012-04-25 This book *Challenging Change* Literary and Linguistic Responses is a collection of twenty three articles which examine change understood in the broadest sense as the need of the modern man to redefine revise deconstruct and reconstruct previous theories histories moralities social relationships forms of language and language use In these times of great change when the only constant seems to be change itself the authors of these essays respond to the challenge and approach the notion of change from the perspectives of literary studies and linguistics The book opens with an introductory overview followed by twenty three articles divided into two sections The authors of the articles come from Serbia Bosnia and Herzegovina Romania the United States Canada Japan and Norway **Dissertation Abstracts International**, 2003

Abstracts of dissertations available on microfilm or as xerographic reproductions Linguistics and Language Behavior Abstracts, 2007-02 **The British National Bibliography** Arthur James Wells, 2006 *American Book Publishing Record*

, 2003 **Text and Context** Claire J. Kramsch, Sally McConnell-Ginet, 1992 The papers in this volume stemming from the Fourth Annual conference of the Consortium for Language Teaching and Learning explore the relationships between form and meaning in language use Advances in Natural Language Generation Michael Zock, Gerard Sabah, 1988 This collection

of essays deals with the problem of natural language generation that is how to simulate by computer the determinism organization and expression of thoughts in oral or written form Compared to sentence or text analysis parsing little work has been done in the field of generation which is still a young discipline **Forthcoming Books** Rose Arny,2004 **Fifth Generation Computer Systems 1988** ,1988 **Natural Language Processing** Richard E. Cullingford,1986 **Towards a Reference Architecture for Natural Language Generation Systems** Lynn Cahill,1999 *Working Papers in Sociolinguistics* ,1980 **A Flexible, Parallel Model of Natural Language Generation** Nigel Ward,1991 FIG suggests that the complexity present in most treatments of syntax is unnecessary For example it does not assemble or manipulate syntactic structures constructions affect the utterance only by the activation they transmit directly or indirectly to words Unlike previous generators FIG handles arbitrarily large inputs since the number of nodes activated in the initial state makes no difference to its operation it handles trade offs among competing goals without additional mechanism since all computation is in terms of commensurate levels of activation and it handles interaction among choices easily since it tends to settle into a state representing a compatible set of choices due to links among nodes representing such choices

Proceedings of the Conferences and Proceedings of the ANLP-NAACL 2000 Student Research Workshop Association for Computational Linguistics North American Chapter,2000 **Focus on Computational Neurobiology** Lei Li,2004 The most distinctive feature in the development of information science and life science is the gradual and growing interlacing of these two fields As a result many new disciplines and technologies have emerged from the overlap of these two areas of science Today information science and life science depend on each other so closely that they can no longer exist and grow independently The interaction and interdependence between the information and life sciences is expected to grow exponentially in the 21st century Development of the life sciences based on information science and computation will reveal many significant challenges in the life sciences as well as lead to many new and important discoveries including targeted and breakthrough drugs Application of these discoveries extends to such areas as biotechnology genomics proteomics e health pharmaceuticals and the agricultural sciences Contents Preface Applications of Smoothing Methods in Numerical Analysis and Optimisation Stochastic Programming Models for Vehicle Routing Problems An Improved Iterative Criterion for GDDM with Elective Parameters Higher order Asymptotic Theories of the Jackknife in a Multivariat AI Magazine ,1992 **The Artificial Intelligence Compendium: Abstracts II** ,1988
