## **Discover Evolutionary Ecology:**

*Discovering Evolutionary Ecology* Peter J. Mayhew, 2006-01-05 This text provides a concise and readable introduction to evolutionary ecology a field of questions united by the intermix of evolutionary and ecological knowledge     **Discovering Evolutionary Ecology** Peter J. Mayhew, 2006-01-05 Why are some kinds of organism species rich and others species poor How do new species arise and why do some go extinct Why do organisms grow and behave the way they do This book provides an introduction to evolutionary ecology the science that brings ecology and evolution together to help understand biological diversity In a concise readable format Peter Mayhew covers the entire breadth of the subject from life histories and the evolution of sex to speciation and macroecology Many emerging fields are also introduced such as metabolic ecology the evolution of population dynamics and the evolution of global ecology *Discovering Evolutionary Ecology* highlights the connections between these different subject areas and for the first time paints a picture of a truly integrated field It illustrates the research tools utilized and demonstrates how advances in one area can spur on developments elsewhere when scientists combine evolutionary and ecological knowledge To maximize accessibility the book assumes only a basic knowledge of biology includes a comprehensive glossary and contains almost no maths Each chapter provides suggestions for further reading and there is also an extensive reference list Ideal as an introduction to evolutionary ecology for undergraduates this book will also interest established researchers providing a broad and up to date context for their work

Ember, Melvin Ember, Peter N. Peregrine, 2006-03 This collection of case studies provides examples of anthropologists working in a variety of settings The case studies are correlated to the chapters of Physical Anthropology and Archaeology 2 E the end of chapter material in the text contains discussion and homework questions directly tied to the case study     **Terrestrial Plant Ecology** Michael G. Barbour, Jack H. Burk, Wanda D. Pitts, 1980 *Terrestrial Plant Ecology* synthesizes the literature pertaining to the ecology of wild plants into a survey for the undergraduate student to teach them the essentials of the interactions between plants and their environment     Mammalia ,2008     **Pillars of Evolution** Douglas W. Morris, Per Lundberg, 2011-07-14 *Pillars of Evolution* provides a fresh and provocative perspective on adaptive evolution Readers new to the study of evolution will find a refreshing new insight that establishes evolutionary biology as a rigorous and predictive science whilst practicing biologists will discover a provocative

book that challenges traditional approaches The book begins by leading readers through the mechanics of heredity reproduction movement survival and development With that framework in place it then explores the numerous ways that traits emerge from the interactions between genetics development and the environment The key message is that adaptive changes in traits and their underlying allelic frequencies evolve through the traits functions and their connection with fitness The complex mappings from genes to traits to fitness are characterized in the structure of evolution A single structure matrix describes why individuals vary in the values of adaptive traits their ability to perform the function of those traits and in the fitness they accrue Fitness depends on how organisms interact with and perceive their environment in time and space These relationships are made explicit in spatial temporal and organizational scale that also sets the stage for the crucially important role that ecology always plays in evolution The ecological hallmarks of density and frequency dependent interactions allow the authors to explore new and exciting insights into evolution s dynamics The theories and principles are then brought together in a final synthesis on adaptation The book s unique approach unites genetic development and environmental influences into a single comprehensive treatment of the eco evolutionary process
