important as the striking objects arguing that it is important to show that all objects illustrate potentially interesting cultural contexts and content The authors explore the disciplines of architecture design cognitive science and museology and offer a methodology by which the quality of museum exhibitions can be judged from a visitor centred perspective They provide new insights into the visitor object encounter and the relationship between visitors objects and museums In addition the book offers a set of useful practical tools for museum professionals for audience research evaluating museum displays and for designing new galleries and striking exhibitions Richly illustrated with photos and diagrams and based on studies of famous galleries in world renowned museums the book will be essential reading for all those concerned with creating effective exhibitions in museum
