**Discovering Parish Boundaries** Angus J. L. Winchester, 1990-01      **Discovering Parish Boundaries** A. J. Winchester, 1990-01-01      *Landscapes, Documents and Maps* Brian K. Roberts, 2008-10-10 The last half century has seen many studies of the origin of the English village As a cross disciplinary enquiry this book integrates materials from geography history economic history archaeology place name studies anthropology and even church architecture These provide varied foundations but the underlying subject matter always engages with landscape studies Beginning with a rigorous examination of evidence hidden within the surviving village and hamlet plans seen on eighteenth and nineteenth century maps the first half of the book shows how these can be classified mapped analysed and then interpreted as important parts of former medieval landscapes Many specific case studies are built into the argument all being drawn from the author's lifetime work on northern England and accessible language is employed From this base the argument develops with the objective of integrating landscape studies with the descriptive and analytical practices of history and drawing these together by using the cartographic methods of historical geography This foundation leads gently into deeper waters to the landed estates in which all settlements developed and the farming and social systems of which they were a part to the land holding arrangements that were integrated into the physical plans providing methods of sharing out the agricultural resources of arable meadow woodland and common grazings and finally to the social divisions present within a changing society A wholly new theme is found in the argument that certain types of land tenure were associated with a class of officer land agent or dreng who in northern England was often linked with the provision of tenants for new villages It is clear from the evidence amassed that the deliberate founding of new villages and the establishment of new plans on older sites was taking place in the centuries between about AD 900 and 1250 Finally the study moves beyond the North of England to review the European roots of planned villages and hamlets and concludes with a challenging hypothesis about their origin in the whole of England This provides pointers towards future enquiry      **Common Land in Britain** Angus J. L. Winchester, 2022 The first authoritative survey of the history of common land in Great Britain from the medieval period to present day More than a million hectares of Britain has the status of common land most of it consisting of semi natural environments of mountain moorland wetland or heath Formerly much more extensive common land was and in many places remains an integral part of the pastoral economy Even where it is no longer used by farmers it plays an increasingly important role in modern life as recreational space and for its value for nature conservation This book provides for the first time an authoritative survey of the history of common land across all three nations of Great Britain from medieval times to the present day It charts how commons have been viewed and valued across the centuries how they have been used and how their vegetation has changed highlighting parallels and differences between the histories of common land in England Scotland and Wales It traces the distinctive legal status of common land and the management regimes which regulated the exercise of common rights

considers the role of commons as spaces for communal gatherings and as a resource for the poor charts the loss of common land but also its persistence during the era of enclosure in the century 1760 1860 and explores the changing conceptions of the value and right use of commons since the nineteenth century and the impact this has had on their ecological character Eight case studies of individual commons illustrate the richness of common landscapes and their history at local level They include crofters common grazings in Sutherland mountain commons in the Lake District and Snowdonia lowland commons in Co Durham Herefordshire and the New Forest turbary allotments in Lincolnshire and the urban commons of Wimbledon and Putney Heath

*From Dust to Digital* Maja Kominko, 2015-02-16 Much of world's documentary heritage rests in vulnerable little known and often inaccessible archives Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation But such rich collections are often at risk of being lost before the history they capture is recorded This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library established to document and publish online formerly inaccessible and neglected archives from across the globe *From Dust to Digital* showcases the historical significance of the collections identified catalogued and digitised through the Programme bringing together articles on 19 of the 244 projects supported since its inception These contributions demonstrate the range of materials documented including rock inscriptions manuscripts archival records newspapers photographs and sound archives and the wide geographical scope of the Programme Many of the documents are published here for the first time illustrating the potential these collections have to further our understanding of history

Between earth and heaven Johanna Kramer, 2016-05-16 *Between earth and heaven* examines the teaching of the theology of Christ's ascension in Anglo Saxon literature offering the only comprehensive examination of how patristic ascension theology is transmitted adapted and taught to Anglo Saxon audiences This book argues that Anglo Saxon authors recognise the Ascension as fundamentally liminal in nature as concerned with crossing boundaries and inhabiting dual states In their teaching authors convert abstract theology into concrete motifs reflecting this liminality such as the gates of heaven and Christ's footprints By examining a range of liminal imagery *Between earth and heaven* demonstrates the consistent sophistication and unity of Ascension theology in such diverse sources as Latin and Old English homilies religious poetry liturgical practices and lay popular beliefs and rituals This study not only refines our evaluation of Anglo Saxon authors knowledge of patristic theology and their process of source adaptation but also offers a new understanding of the methods of religious instruction and uses of religious texts in Anglo Saxon England capturing their lived significance to contemporary audiences

Statemaking and Territory in South Asia Bernardo A. Michael, 2014-10-01 *Statemaking and Territory in South Asia* Lessons from the Anglo Gorkha War

1814 1816 seeks to understand how European colonization transformed the organization of territory in South Asia through an examination of the territorial disputes that underlay the Anglo Gorkha War of 1814 1816 and subsequent efforts of the colonial state to reorder its territories The volume argues that these disputes arose out of older tribute taxation and property relationships that left their territories perpetually intermixed and with ill defined boundaries It also seeks to describe the long drawn out process of territorial reordering undertaken by the British in the nineteenth and twentieth centuries that set the stage for the creation of a clearly defined geographical template for the modern state in South Asia Boundaries of counties and parishes in Scotland John Hay Shennan,1892 The Moral Economy of the Countryside Rosamond Faith,2019-10-31 Shows the moral economy of early medieval England transformed by feudal thinking in the aftermath of the Norman Conquest **The Historic Parishes of England and Wales** Roger J.
