From the fragmentary remains of giant extinct animals found in the early 1800s to the dinosaur wars in the American West to the amazing near complete skeletons found around the world today Darren Naish tells how these discoveries have led not only to the recognition of new species and whole new groups but also to new theories of evolutionary history. Along the way we encounter dinosaurs both familiar and obscure including Tyrannosaurus rex the giant sauropods and most recently the feathered dinosaurs of China. As he describes these significant finds Naish explains in clear accessible language how our ideas about dinosaur appearance biology and behavior have developed and changed over time and what the state of knowledge is today.
