Kramer, 2010 Augustus T Dowd could scarcely believe his eyes when he stumbled upon one of nature's majestic wonders in 1852 Hunting down a wounded bear in the hills above the mining camp of Murphys Dowd instead found a tree of mammoth proportions After initial skepticism about the size of these trees news of Dowd's discovery quickly spread Local businessmen soon acquired the grove of 100 mammoth trees or giant sequoia and built accommodations for travelers Thus began one of California's earliest tourist attractions in 1853 Dedicated as a California State Park in 1931 Calaveras Big Trees State Park hosts 250 000 annual visitors who come from around the world to marvel at these wondrous giants in their magnificent natural surroundings Grid Computing Soha Maad, 2012-05-16 Grid research rooted in distributed and high performance computing started in mid to late 1990s Soon afterwards national and international research and development authorities realized the importance of the Grid and gave it a primary position on their research and development agenda The Grid evolved from tackling data and compute intensive problems to addressing global scale scientific projects connecting businesses across the supply chain and becoming a World Wide Grid integrated in our daily routine activities This book tells the story of great potential continued strength and widespread international penetration of Grid computing It overviews latest advances in the field and traces the evolution of selected Grid applications The book highlights the international widespread coverage and unveils the future potential of the Grid The Trees Are Speaking Lynda V.
