Discrete Event Simulation 4ed:

Fundamentals of Performance Evaluation of Computer and Telecommunication Systems Mohammed S. Obaidat, Nouredine A. Boudriga, 2010-01-26 The only singular all encompassing textbook on state of the art technical performance evaluation Fundamentals of Performance Evaluation of Computer and Telecommunication Systems uniquely presents all techniques of performance evaluation of computers systems communication networks and telecommunications in a balanced manner Written by the renowned Professor Mohammad S Obaidat and his coauthor Professor Nouredine Boudriga it is also the only resource to treat computer and telecommunication systems as inseparable issues The authors explain the basic concepts of performance evaluation applications performance evaluation metrics workload types benchmarking and characterization of workload This is followed by a review of the basics of probability theory and then the main techniques for performance evaluation namely measurement simulation and analytic modeling with case studies and examples Contains the practical and applicable knowledge necessary for a successful performance evaluation in a balanced approach Reviews measurement tools benchmark programs design of experiments traffic models basics of queueing theory and operational and mean value analysis Covers the techniques for validation and verification of simulation as well as random number generation random variate generation and testing with examples Features numerous examples and case studies as well as exercises and problems for use as homework or programming assignments Fundamentals of Performance Evaluation of Computer and Telecommunication Systems is an ideal textbook for graduate students in computer science electrical engineering computer engineering and information sciences technology and systems It is also an excellent reference for practicing engineers and scientists Discrete-event System Simulation Jerry Banks, 2010 For junior and senior level simulation courses in engineering business or computer science Discrete Event System Simulation examines the principles of modeling and analysis that translate to all software tools rather than a particular software tool This language independent text explains the basic aspects of the technology including the proper collection and analysis of data the use of analytic techniques verification and validation of models and designing simulation experiments It offers an up to date treatment of simulation of manufacturing and material handling systems computer systems and computer networks Students and instructors will find a variety of resources including simulation source code for download additional exercises and solutions web links and errata at the associated website <http://dmnicol.web.engr.illinois.edu/bcnn/index.html> **Discrete Event System Simulation 4e** Jerry Banks, 2005 **Dementia, 4th Edition** David Ames, Alistair Burns, John T. O'Brien, 2010-11-26 Winner of the BMA 2011 book awards psychiatry category Winner of the Australian Journal of Ageing book of the year award This definitive work on dementia and related disorders has been fully updated and revised to reflect recent advances in this fast moving field The incidence of dementia continues to rise as the population of the world ages and the condition represents one of the most significant challenges facing societies and health professionals in the next half century In this the

most comprehensive single volume work available on the subject the editors have met this challenge by assembling a team of the world's leading experts on all aspects of the condition from history epidemiology and social aspects to the latest neurobiological research and advanced therapeutic strategies

Dynamic Data Driven Applications Systems Frederica Darema, Erik Blasch, Sai Ravela, Alex Aved, 2020-11-02 This book constitutes the refereed proceedings of the Third International Conference on Dynamic Data Driven Application Systems DDDAS 2020 held in Boston MA USA in October 2020 The 21 full papers and 14 short papers presented in this volume were carefully reviewed and selected from 40 submissions They cover topics such as digital twins environment cognizant adaptive planning systems energy systems materials systems physics based systems analysis imaging methods and systems and learning systems

Tutorial, Modern Design and Analysis of Discrete-event Computer Simulations Edward J. Dudewicz, Zaven A. Karian, 1985 The objective of this tutorial is to provide a working understanding of the design implementation and analysis of computer simulations Preface

Delivering Performance in Food Supply Chains Carlos Mena, Graham Stevens, 2010-01-28 Food and drink supply chains are complex continually changing systems involving many participants They present stakeholders across the food and drinks industries with considerable challenges Delivering performance in food supply chains offers expert perspectives to help practitioners and academics to improve their supply chain operations The Editors have identified six key challenges in managing food and drinks supply chains Each section of the book focuses on one of these important issues The first chapters consider the fundamental role of relationship management in supply chains The next section discusses another significant issue aligning supply and demand Part three considers five different approaches to effective and efficient process management while quality and safety management an issue food companies need to take very seriously is subject of the next section Parts five and six review issues which are currently driving change in food supply chains the effective use of new technologies and the desire to deliver food sustainably and responsibly With expert contributions from leaders in their fields Delivering performance in food supply chains will help practitioners and academics to understand different approaches in supply chain management explore alternative methods and develop more effective systems Considers the fundamental role of relationship management in supply chains including an overview of performance measurement in the management of food supply chains Discusses the alignment of supply and demand in food supply chains and reviews sales and operations planning and marketing strategies for competitive advantage in the food industry Provides an overview of the effective use of new technologies and those that will be used in the future to deliver food sustainably and reliably

Practical Applications of Parallel Computing Laurence Tianruo Yang, 2003 The continuous progress in scientific research is one of the important factors explaining the constantly increasing demand for computational power On the other hand one of the results of such progress is the availability of more powerful computer platforms To that end this volume reviews a broad array of subjects based on the solutions to the daily problems in industrial production research and development
