Discursive Acts:

Discursive Acts Robert Perinbanayagam, 2017-07-05 *Language Signs and Selves* applies conversational analysis to the discourse of everyday life and its roles in social behavior. The explanation offered of the complex elements and processes of language use is theoretically and empirically grounded, synthesizing European post-structuralist theory and semiotics with American pragmatist currents. This book parallels work done under other rubrics: sociolinguistics, conversation and discourse analysis, and ethnomethodology. This work however presents the same matter from a different standpoint. While ethnomethodology and sociolinguistics focus on certain formal properties of conversations, they have pursued the quest for these properties with great methodological rigor while avoiding questions about intentions. In their work, as in that of many structuralists, discourse has become depersonalized, with the linguistic form itself becoming an independent entity sealed from the world of selves, interaction, conflict, and suffering. Perinbanayagam's interest is in displaying the dialogic properties of such discourses, conceiving each element in them as pragmatic and directed. In many ways, *Language Signs and Selves* is an enlargement and exemplification of themes discussed in the analysis of language interactions and social relationships. The author takes dialogue to be the central event of human being and doing and argues that it is the defining principle of all actions and interactions. Drawing from a variety of sources, he seeks to construct a theory of interaction between humans that is dialectical in all senses of the word, that is to say, a theory concerned with dialects and double processes as well as with speaking and the logic of relational processes.

Discursive Acts R. S. Perinbanayagam, 1991 *Psychotherapy as a Developmental Process* Michael Basseches, Michael F. Mascolo, 2009-08-05 For all those engaged in psychotherapy practice, regardless of modality or approach, the goal of this book is to provide a framework and method for thinking about their work that allows for critical reflection on their own successes and disappointments and on the similarities and differences among their own and other practitioners' work with different clients. The authors use a novel common factors approach based on the idea that some form of development is the outcome of all effective psychotherapy, despite other differences that may exist. While most existing psychotherapy research focuses on treatment outcomes primarily in terms of symptom reduction, this book offers an alternative research approach that systematically tracks the psychotherapy process itself and describes each case's unique developmental outcome. In particular, Basseches and Mascolo focus on the questions of what kinds of therapeutic resources therapists are offering to their clients and whether and how clients are able to make use of these resources in the service of their own development. The goal is to provide a descriptive framework that can be used to appreciate the highly varied ways in which particular therapists tailor their work to unique clients' developmental needs while at the same time offering a prescription of a more rigorous method for recognizing and correcting the problem when a particular therapist's way of working is not serving the client well. Ideally, this type of process-focused research will complement existing outcome research and be more likely than further symptom reduction studies to result in the improvement of overall psychotherapy.
