## **Disease Detectives Scientists At Work:**

*Making Healthy Decisions on Alcohol, Tobacco and Other Drugs* B. S. C. S. Staff, 2000-02      *Beating Back the Devil* Maryn McKenna, 2008-06-17 The universal human instinct is to run from an outbreak of disease like Ebola These doctors run toward it Their job is to stop epidemics from happening They are the disease detective corps of the US Centers for Disease Control and Prevention CDC the federal agency that tracks and tries to prevent disease outbreaks and bioterrorist attacks around the world They are formally called the Epidemic Intelligence Service EIS a group founded more than fifty years ago out of fear that the Korean War might bring the use of biological weapons and like intelligence operatives in the traditional sense they perform their work largely in anonymity They are not household names but over the years they were first to confront the outbreaks that became known as hantavirus Ebola and AIDS Every day they work to protect us by hunting down the deadly threats that we forget until they dominate our headlines West Nile virus anthrax and SARS among others In this riveting narrative Maryn McKenna the only journalist ever given full access to the EIS in its fifty three year history follows the first class of disease detectives to come to the CDC after September 11 the first to confront not just naturally occurring outbreaks but the man made threat of bioterrorism They are talented researchers many with young families who trade two years of low pay and extremely long hours for the chance to be part of the group that are on the frontlines in the yellow suits and masks that has helped eradicate smallpox push back polio and solve the first major outbreaks of Legionnaires disease toxic shock syndrome and E coli O157 and works to battle every new disease before it becomes an epidemic Urgent exhilarating and compelling *Beating Back the Devil* takes you inside the world of these medical detectives who are trying to stop the next epidemic before the epidemics stop us      **In Defense of Science** Frank R. Spellman, Joan

Price-Bayer, 2010-12-16 Today only a few people outside of the scientific community are conversant with the tradition of science and its many breakthroughs The rest are scientifically illiterate So say Frank R Spellman and Joni Price Bayer authors of *In Defense of Science Why Scientific Literacy Matters* This book explains why ordinary citizens need to have an understanding of science its methods and its groundbreaking discoveries The authors introduce the most basic scientific concepts in accessible and straightforward language Along the way they debunk several misconceptions of science and scientists and arrive at a view of science as an integral part of society policy and everyday life The book begins with an introduction to science and its basic concepts including a brief and entertaining history of science and scientific discoveries before taking on current views of science in society It surveys the many sources of our ideas of science including pop culture classics of literature news media and political discourse Much of the information from these sources tends to mislead and the only way to guard against such misinformation is to become scientifically literate and promote scientific literacy in society The book therefore delves into the reasons that so many people do not understand basic scientific principles and do not keep up with scientific breakthroughs and finishes by examining the current state of science education It includes many resources

for further reading and is presented in an engaging and entertaining way It offers much food for thought for anyone concerned with science in today s world      *Patient Zero (Revised Edition)* Marilee Peters,2021-04-06 Engrossing true stories of the pioneers of epidemiology who risked their lives to find the source of deadly diseases now revised to include updated information and a new chapter on Covid 19 More people have died in disease epidemics than in wars or other disasters but the process of identifying these diseases and determining how they spread is often a terrifying gamble Epidemiologists have been ignored mocked or silenced all while trying to protect the population and identify patient zero the first person to have contracted the disease and a key piece in solving the epidemic puzzle Patient Zero tracks the gripping tales of eight epidemics and pandemics how they started how they spread and the fight to stop them This revised edition combines a brand new design with updated information and features diseases such as Spanish Influenza Ebola and AIDS as well as a new chapter on Covid 19      Science Books for Children Denise Murcko Wilms,1985 Provides an annotated list of useful books about math computers astronomy physics chemistry earth sciences biology experiments and scientists      **Fifth Book of Junior Authors & Illustrators** Sally Holmes Holtze,1983 Comprises 239 sketches of authors and illustrators of young people s books who have come to prominence since the previous volume      **Citizenship** Ella Cannon Levis,1923      *Disease Detectives* Melvin Berger,1978-01-01 Describes the activities of the Center for Disease Control in Atlanta Ga in tracking down the cause of Legionnaires disease and other mysterious health problems      **Childrens' Catalog** H.W.
