## **Disciplining English Alternative Histories Critical Perspectives:**

**Disciplining English** David R. Shumway, Craig Dionne, 2012-02-01 These provocative essays explore the unwritten often unacknowledged codes conventions and ideologies overseeing the evolution and current practice of English as a discipline The first section of the book offers historical perspectives how composition became distinguished from literature how key intellectuals shaped the discipline and how various specialties Renaissance literature American literature theory became subfields The second section focuses on how certain aesthetic categories of art and universal experience persist today in the actual teaching and writing of English While it is fashionable to say that we are living in the age of poststructuralism or that literary theory has delivered us from idealized conceptions of authorship and inherent meaning these essays examine how these conceptions nevertheless remain and are transmitted in different types of classroom settings in textbooks and in the self fashioning of academic careers At a time when the role and function of English departments have become matters of both academic and public debate this book will be a welcome resource for students professionals and anyone interested in the Culture Wars of the past two decades

Disciplining English David R. Shumway, Craig Dionne, 2002-07-17 Offers historical and present day perspectives on what English departments do and how and why they do it

*Approaches to Teaching the History of the English Language* Mary Hayes, Allison Burkette, 2017-08-29 The History of the English Language is a traditional course whose instructors are tasked with balancing various institutional curricular and student needs Additionally the course s prodigious subject poses challenges for new as well as veteran instructors It encompasses a broad chronological geographic and disciplinary scope and in the twenty first century classroom has come to account for English s transformative relationship with the internet and social media In *Approaches to Teaching the History of the English Language* experienced instructors explain the influences and ingenuity behind their successful teaching practices

*Intention and Interpretation: A Short History* Ralf Grüttemeier, 2022-02-07 Intention plays a complex role in human utterances The interpretation of literary texts is a strong case in point for about two hundred years there have been conflicting views about whether and how much authorial intention should matter when professional readers interpret literature These debates grew increasingly fierce during the post World War II period the landmarks of which were the notions of intentional fallacy and the death of the author Seventy odd years later there is still no consensus in sight What has always been neglected in the debates around authorial intention however is a reflection on the historical dimension of the debate and how historically bound each of the theoretical positions in the debate were This book focusses precisely on the historical dimension of authorial intention providing a systematic historical reconstruction of the importance ascribed to it in literary texts from Classical Greece to the present day and including a chapter on authorial intention in jurisdiction and legal interpretation from a historical perspective The book reconstructs a typology of the most important concepts of intention in interpretation for diachronic and synchronic use At the same time it offers insights from a field theoretical perspective into

how literary studies as a discipline works over time and how notions of intention and interpretation help create forms of literary knowledge     **Transforming English Studies** Lori Ostergaard, Jeff Ludwig, 2009-02-23 Transforming English Studies provides a uniquely interdisciplinary view of English studies crises both real and imagined and works toward resolving the legitimate pathologies that threaten the sustainability of the discipline     Design Discourse David Franke, Alex Reid, 2010-10-06 Design Discourse Composing and Revising Programs in Professional and Technical Writing addresses the complexities of developing professional and technical writing programs The essays in the collection offer reflections on efforts to bridge two cultures what the editors characterize as the art and science of writing often by addressing explicitly the tensions between them Design Discourse offers insights into the high stakes decisions made by program designers as they seek to function at the intersection of the practical and the abstract the human and the technical     **Works and Days**, 2005     Forthcoming Books Rose Arny, 2002     Moving Targets Leslie David Burns, 2005     *Anglo-American Hispanists and the Spanish Civil War* Sebastiaan Faber, 2008-07-15 Perceptively written this thoroughly researched book illuminates the political labyrinth which many American scholars had to navigate in the 1930s 1950s indeed still do today At the same time it goes a long way to explaining why Spain particularly its civil war engaged continues to engage Anglo Saxon writers

Changing of Knowledge in Composition Lance Massey, Richard C. Gephardt, 2011-07-16 Lance Massey and Richard Gebhardt offer in this collection many signs that composition again faces a moment of precariousness even as it did in the 1980s the years of the great divorce from literary studies The contours of writing in the university again are rapidly changing making the objects of scholarship in composition again unstable Composition is poised to move not from modern to postmodern but from process to postprocess from a service oriented field to a research driven discipline Some would say we are already there Momentum is building to replace composition and the pedagogical imperative long implied in that term with a writing studies model devoted to the study of composition as a fundamental tool of and force within all areas of human activity Appropriately contributors here use Stephen M North's 1987 book *The Making of Knowledge in Composition* to frame and background their discussion as they look at both the present state of the field and its potential futures As in North's volume *The Changing of Knowledge in Composition* describes a body of research and pedagogy brimming with conflicting claims methodologies and politics and with little consensus regarding the proper subjects and modes of inquiry The deep ambivalence within the field itself is evident in this collection Contributors here envision composition both as retaining its commitment to broad based generalized writing instruction and as heading toward content based vertical writing programs in departments and programs of writing studies They both challenge and affirm composition's pedagogical heritage And they sound both sanguine and pessimistic notes about composition's future     **Making People "people"** Jory Jay Brass, 2006

**Setting Instincts** Yael Ben-Zvi, 2003     **Teaching Academic Writing** Patricia Friedrich, 2008-05-21 Teaching Academic Writing examines the issues that confront teachers of academic writing classes In a series of ten teacher focused

chapters Friedrich offers practical advice and solutions in areas of teaching assessment and feedback     *Subject Guide to Books in Print* ,1996     *Canadian Journal of Native Education* ,2009     *The British National Bibliography* Arthur James Wells,2009     **Disciplinary Identities** Steven Mailloux,2006 What are the historical relations among academic disciplines focused on oral and written rhetoric In *Disciplinary Identities* Steven Mailloux examines the formation of English literary studies speech communication and composition explaining how these fields came to be shaped and separated as they are today In so doing Mailloux illustrates the interpretive power of a technique he calls rhetorical hermeneutics his critical history of disciplinary formations both describes rhetoric as a topic of study and uses it as a tool for understanding how scholarship is organized professionally and politically Mailloux thus traces the paths taken by the topic of rhetoric as it migrates among disciplines At the same time he examines the tropes arguments narratives and other pieces of rhetoric used by practitioners to shape disciplinary identities Mailloux also uses rhetorical hermeneutics to explore the intersections of academic disciplines and nonacademic public spheres moving from the role of nineteenth century African American intellectuals in and outside the academy to that of the academic intellectual within post September 11 cultural politics Through multidisciplinary inquiry *Disciplinary Identities* seeks to engage all teachers and scholars of the language arts in a renewed conversation about our shared history and our mutual devotion to pedagogy criticism history and theory
