

Discourse organization

- There are several ways of demonstrating informally that discourse is organized. First, conversationalists themselves frequently refer to discourse structure in the course of conversation, by utterances such as *oh, by the way...., anyway, as I was saying* In everyday situations, people are aware that not anything can follow anything: some utterance require to be prefaced by such an excuse or a claim of relevance. This insertion of metatext, pointing to the organization of the text itself, is particularly common in certain discourse styles, such as lecturing, and it occurs in written and spoken discourse.

semiotic perspective on discourse organization and change Here discourse encompasses not only the multi modal resources that people mobilize in organizational inter action but also the practices and transformative dynamics afforded by those resources The organizational changes highlighted in the book revolve around three dimensions of work that are increasingly coming to the fore participation boundary spanning and knowledging These dimensions are explored through case studies including a health planning project an initiative to standardize work practices and the tension between paper based and IT based reporting The book addresses the relevance of this discourse perspective to organizational research more broadly by investigating organization as a dynamic of resemiotizations Cover illustration by John Reid *Organizational Discourse*

Multimodality, Digitalization and Cognitivity in Communication and Pedagogy Natalya V. Sukhova, Tatiana Dubrovskaya, Yulia A. Lobina, 2021-10-21 This book positions itself at the intersection of the key areas of the modern humanities. Different authors from a variety of countries take innovative approaches to investigating multimodal communication, adapting pedagogical design to digital environments and enhancing cognitive skills through transformations in teaching and learning practices. The eclectic forms under study require eclectic approaches and methodologies, and the authors cross disciplinary boundaries drawing on philosophy, linguistics, semiotics, computational linguistics, mathematics, cognitive studies, and neuroaesthetics. Part I presents methods of analysing multimodal communication in its different displays, covering promotional video in crowdfunding project presentations, multimodal public signs of prohibition and visuals as arguments. Part II explores varied teaching methodologies that have emerged as a result of and in response to modern technological changes and contains some practical hints for educators. It demonstrates the pedagogical potential of video games, virtual worlds, linguistic corpora, and online dictionaries. Part III focuses on psychological and cognitive factors influencing success in the classroom, primarily ways of developing students and teachers' personalities. The volume sits at the intersection between Communication Studies, Digital Humanities, Discourse Analysis, Education Theory, and Cognitive Studies and is useful to scholars and students of communication, languages, education, and other areas of the humanities. This book should trigger scholarly discussions as well as stimulating practitioners' interest in these fields.
