Discourse On The Real Nature Of Self A:

Exploring the Structure of Emptiness Mathew Varghese, 2012-12-01 Nagarjuna is one of the finest philosophers who ever lived This second century Buddhist philosopher from south India is known for his criticism on speculative theories and viewpoints But his name is better known for introducing the idea of emptiness sunyata a philosophical concept that had hugely influenced the discourses of Eastern philosophy religion and culture for about 2000 years Nagarjuna cleverly introduced emptiness sunyata into Buddhist discourses to explain its central philosophy the philosophy of Middle Path Through the negative mode of argumentation he taught how we naturally get trapped into extreme viewpoints and speculate on them His philosophy of Middle Path Madhyamika explains the progress of human reasoning moving in its natural course avoiding extreme viewpoints for finding harmony and freedom During the second century in a different milieu Nagarjuna warned his students about the dangers of speculative thought created out of extreme viewpoints and philosophical doctrines He taught them to look into the structures of such doctrines critically by using negation to know what the truth is Therefore the philosophical idea of emptiness sunyata is not the end of negation assuming perfect nihilism but teaching us that it would work like medicine for removing all our ignorance More precisely it is like zero sunya in mathematics a number with an undefined value but real numbers find newer values by associating with it It is a philosophical tool that helps us control our alleged fears anger petty hatred etc by invoking the natural course of human compassion karuna for us to live and die naturally Therefore the structure of emptiness is the philosophy of Middle Path

The Bhagavad-Gītā, with the Commentary of Śrī Śankarāchārya, 1901 *The Bhagavad-Gīta*, 1918 **The Bhagavad-Gītā**, 1929 Gothic writing 1750-1820 Robert Miles, 2017-06-01 Now available again in paperback this provocative study by Robert Miles uses the tools of modern literary theory and criticism to analyse this very distinctive body of texts Miles introduces the reader to contexts of Gothic in the eighteenth century including its historical development and its placement within the period s concerns with discourse and gender By using texts ranging from sensational novels such as *The Monk* and *The Mysteries of Udolpho* poetic variations on Gothic by Coleridge Shelley and Keats to satirical works on the theme by Jane Austen Miles presents an intriguing overview of Gothic literature By drawing extensively on the ideas of Michel Foucault to establish a genealogy he brings Gothic writing in from the margins of popular fiction resituating it at the centre of debate about Romanticism

Jones, 2020-11-30 Winner of the 2021 Toshihide Numata Book Award in Buddhism The assertion that there is nothing in the

constitution of any person that deserves to be considered the self than a permanent unchanging kernel of personal identity in this life and those to come has been a cornerstone of Buddhist teaching from its inception Whereas other Indian religious systems celebrated the search for and potential discovery of one's true self Buddhism taught about the futility of searching for anything in our experience that is not transient and ephemeral But a small yet influential set of Mahayana Buddhist texts composed in India in the early centuries CE taught that all sentient beings possess at all times and across their successive lives the enduring and superlatively precious nature of a Buddha This was taught with reference to the enigmatic expression tathagatagarbha the womb or chamber for a Buddha which some texts refer to as a person's true self The Buddhist Self is a methodical examination of Indian teaching about the tathagatagarbha otherwise the presence of one's Buddha nature and the extent to which different Buddhist texts and authors articulated this in terms of the self C V Jones attends to each of the Indian Buddhist works responsible for explaining what is meant by the expression tathagatagarbha and how far this should be understood or promoted using the language of selfhood With close attention to these sources Jones argues that the trajectory of Buddha nature thought in India is also the history and legacy of a Buddhist account of what deserves to be called the self an innovative attempt to equip Mahayana Buddhism with an affirmative response to wider Indian interest in the discovery of something precious or even divine in one's own constitution This argument is supplemented by critical consideration of other themes that run through this distinctive body of Mahayana literature the relationship between Buddhist and non Buddhist teachings about the self the overlap between the tathagatagarbha and the nature of the mind and the originally radical position that the only means of becoming liberated from rebirth is to achieve the same exalted status as the Buddha
