*Discourse Theory in European Politics* D. Howarth, J. Torfing, 2004-11-30 This volume of essays employs discourse theory to analyze mainstream topics in contemporary European politics Inspired by developments in post structuralist psychoanalytic and post Marxist theory each contributor problematizes a central issue in European governance including European security Third Way politics constitutional and administrative reform new forms of nationalism and populism the shift from welfare to workfare environmental politics and local government Alongside these substantive issues the book tackles questions raised by the difficulties of applying discourse theory to empirical cases Globalisation, Migration, and the Future of Europe Leila Simona Talani, 2012-02-06 Showcasing an original interdisciplinary approach this text examines the effect of migration on the domestic politics of individual states and how they are eroding the distinctions between the domestic and foreign policy the inside and outside components of politics and law During the twentieth century the context in which migrants negotiate their integration within legal social cultural economic and political spaces changed significantly Drawing upon varied perspectives from the US UK France Germany Switzerland Russia and Italy among others this work develops a comprehensive understanding of the impact migratory networks are having on European societies It investigates the strategies of integration or discrimination which are developed in Europe by state institutions legal codes political movements and even immigrant communities themselves when confronted with the growing influence of migratory networks The result is a highly topical exploration of the political and legal dimensions of migration in the EU that develops new approaches to the issue of social integration and the exclusion of migrants and migrant communities Globalization Migration and the Future of Europe will be of interest to students and scholars of migration European studies globalization and International Law **Europeanisation and Foreign Policy** Juha Jokela, 2010-12-14 This book examines the relationship between the European Union EU and its member states by analysing how the process of integration in the field of foreign policy is shaping member states identities Focusing on the mutually constitutive aspects of the relationship between the EU and its member states Jokela argues that we need discourse analytic and comparative tools for analysing foreign policy in the EU context and draws on the contributions of poststructural international relations Providing empirically rich and comparative case studies that explore the impact of europeanization of foreign and security policy on Finnish and British foreign policy discourses as well as these states identities Jokela generates detailed knowledge about the interplay of national and supranational foreign policy discourses Making an important contribution to europeanization studies foreign policy analysis and discourse analysis this book will be of strong interest to students and scholars of European politics comparative politics foreign policy and international relations **Logics of Critical Explanation in Social and Political Theory** Jason Glynos, David Howarth, 2007-09-12 This book develops a novel approach to critical explanation as a function of logics taking a distinctive approach to social science explanation and political studies more specifically which avoids the

problem of scientism      **Discourses on Identity in 'First' and 'Other' Serbia** Ana Omaljev, 2016-01-26 Serbia is still widely thought of as an unfinished state whose people struggle to establish a compelling identity narrative in answer to the question who are we While existing literature has over analyzed Serbian nationalism the Serbian public sphere remains largely ignored This engaging and timely book fills this gap by giving context to the persistent and overwhelming dialogue between opposing factions on the identity spectrum in Serbia Omaljev s focus on elite discourses provides a fresh perspective on this contentious subject It offers an original understanding of the competing arguments surrounding First and Other Serbia and of the contested visions of Serbian national identity and broader European identity By closely examining the identity vocabulary of Serbian elites and the opposing ways in which these elites view the use of labels such as anti Serbian patriot and traitor this book provides a vital lesson in post conflict nation building and raises important questions about the symbolic representations of political and cultural identities A much needed and compelling intervention in the Serbian identity discourse Omaljev s work is a must read for any researcher on the Western Balkans      *Discourse Analysis and European Union Politics* Kennet Lynggaard, 2019-09-16 This book reflects on the latest developments in discourse analysis in the context of EU politics research It explores discourse analysis as a tool to study and understand EU politics covering key conceptual methodological and research strategic questions The analytical approach advanced in this book is anchored in discursive institutionalism the newest addition to approaches in new institutionalism The author particularly focuses on discourse as a strategic resource for political purposes as a device for inclusion and exclusion in policy making and as a means of conveying and appealing to political emotions as well as the role visual discourse and imagery play in day to day EU politics Including a variety of examples using different combinations of research techniques and data material the book also addresses issues related to the study of discursive structures and agency discourse conflict and consensus causality and the time dimension in discourse analysis      *Discourse Theory and Cultural Analysis* Nico Carpentier, Erik Spinoy, 2008 This book fills the gap between discourse theory and cultural approaches and provides an innovative and interdisciplinary contribution to areas such as cultural studies political science literary art communication and media studies the Internet and film studies By strictly focusing on the discourse theory of Laclau and Mouffe the authors have distilled a coherent volume out of a diversity of perspectives that offer important contributions to a wide range of academic discussions fields and disciplines

**Emissions Trading Schemes** Sanja Bogojevic, 2013-07-04 Over the last four decades emissions trading has enjoyed a high profile in environmental law scholarship and in environmental law and policy Much of the discussion is promotional preferring emissions trading above other regulatory strategies without however engaging with legal complexities embedded in conceptualising scrutinising and managing emissions trading regimes The combined effect of these debates is to create a perception that emissions trading is a straightforward regulatory strategy imposable across various jurisdictions and environmental settings This book shows that this view is problematic for at least two reasons First emissions trading

responds to distinct environmental and non environmental goals including creating profit centres substituting bureaucratic control of resources and ensuring regulatory compliance This is important as the particular purpose entrusted to a given emissions trading regime has as its corollary a particular governance structure according to which the regime may be constructed and managed and which trusts the emissions market the state and rights in emissions allowances with distinct roles Second the governance structures of emissions trading regimes are culture specific which is a significant reminder of the importance of law in understanding not only how emissions trading schemes function but also what meaning is given to them as regulatory strategies This is shown by deconstructing emissions trading discourses that is by inquiring into the assumptions about emissions trading as featuring in emissions trading scholarship and in debates involving law and policymakers and the judiciary at the EU level Ultimately this book makes a strong argument for reconfiguring the common understanding of emissions trading schemes as regulatory strategies and sets out a framework for analysis to sustain that reconfiguration
