Discourses Of The Environment:

Discourses of the Environment Eric Darier, 1998-12-16 This book is the first to provide students with critical understandings of the environment using a range of theoretical perspectives inspired from Michel Foucault Discourses of the Environment, 2001 This study explores environmental discourses and rhetoric The first part provides a review of postmodern approaches to discourse analysis a description of methodologies used to identify environmental discourses and creates a combination of these methodologies using narrative and graphic resources A second part employs the combined methodology to explore the debate about the northern expansion of Santaf de Bogot Colombia 1999 2001 using a selection of public documents that include legal resolutions academic papers maps and newspaper articles In the debate of Bogot the institutions involved District Planning Department DAPD Regional Environmental Authority CAR and the Colombian Ministry of the Environment MMA didn t reached a final agreement over whether the city must develop over lands of high ecological value or how it must be done The debate represents the universal conflict of preservation vs development and the common conflict that arises when cities encroach vulnerable ecosystems The exploration is made in three levels The first is a narrative description of the city the Territorial Plan and a timeline summarizing main events in the debate The second level presents a discourse and rhetoric analysis of the institutions academics and community leaders This section provides tables that summarize arguments and discourse characteristics and a graphic model illustrating the discourse position of each actor It emphasizes on exploring the mixture of elements from discourses that are different in their assumptions The third level presents the predominant discourses common assumptions discourse tensions and discourse strategies The study explores the inconsistencies of the institutional discourses of sustainability democratic pragmatism and administrative rationalism and the technical and rhetorical presentation of issues such as community participation biodiversity and urban growth The rhetoric of the law is explored also as one of the possible sources of failure in the agreement process The conclusion summarizes findings reflects about the methodology provides a personal opinion and proposes some lessons for planners

Discourses of the Environment Éric Darier, **The Politics of the Earth** John S. Dryzek, 2013 John Dryzek provides an accessible introduction to thinking about the environment by looking at the way people use language on environmental issues He analyses the main discourses from the last 30 years and those likely to be influential in future Environmental Discourse and Practice Lisa M. Benton, John Rennie Short, 2000-02-21 This book brings together a set of readings that throw light on the relationship between people and the environment Provides both historical background and an analysis of key debates and theories Based on tried and tested classroom teaching material Uses the idea of environmental discourses to explain human environmental relationships *Framing Discourse on the Environment* Richard Alexander, 2010-04-15 In this study Richard Alexander presents a series of original and empirically based case studies of the language and discourse involved in the discussion of environmental and ecological issues Relying upon a variety of different text types and genres

including company websites advertisements press articles speeches and lectures Alexander interrogates how in the media press corporate and activist circles language is employed to argue for and propagate selected positions on the growing ecological crisis For example he asks How are ecological and environmental concerns articulated in texts What do we learn about ecological problems through texts from differing sources What language features accompany ecological discourse in differing contexts and registers Attention is especially directed at where this discourse comes into contact with business economic and political concerns Commonplaces of Scientific Evidence in Environmental Discourses Denise

Tillery,2017-11-22 This book focuses on the uses of scientific evidence within three types of environmental discourses popular nonfiction books about the environment traditional and social media texts created by a grassroots environmental group and a set of data displays that make arguments about global warming in a variety of media and contexts It traces the operations of eight commonplaces about science and shows how they recur throughout these contexts starting with Rachel Carson s Silent Spring and ending with contemporary blogs and social media The commonplaces are shown to embed ideological assumptions and simultaneously challenge those assumptions In addition the book addresses the potential dangers involved in relying too heavily on aspects of these commonplaces and how they can undermine the goals of some of the writers who use them Political Modernisation and the Environment J. van Tatenhove,B. Arts,P. Leroy,2013-03-14

Recent years have witnessed a substantial change in both the organisation and substance of environmental policy both national and international Western societies have seen a change in the relationships between the state the market and civil society leading to new conceptions of governance a process here called political modernisation that gives rise to the institutionalisation of new policy arrangements An environmental policy arrangement refers to the organisation and substance of a policy domain in terms of policy coalitions policy discourses rules of the game and resources The book uses these theoretical notions to analyze changes in organisation substance and governance in several environmental policy domains such as infrastructure policies global policies on climate change and biodiversity green planning and agriculture policy Changing relationships between the state the market and civil society caused by processes of globalization privatisation and individualisation have resulted in a plurality of policy arrangements in different domains Despite the fact that environmental politics has been substantially renewed there is a delicate balance between traditional and new policy arrangements One of the main themes of the book is the explanation of this balance **Environmental Management** Geoff

A. Wilson,Raymond L. Bryant,2021-07-06 First published in 1997 An introductory text on environmental management with a global coverage including attention paid to the Third World The perspective of the book is geographical and the treatment draws on the broad and complementary experience of the two authors **Environmental Security and Gender** Nicole

Detraz,2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing condition of the global environment Concepts

such as environmental security and resource conflict have been used to hint at these significant linkages. While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts, there has been little examination of the intersection between approaches to environmental security and gender. This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies. It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions. By adopting a feminist environmental security discourse, this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security-environment connections. Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security-environment connections. This multidisciplinary volume draws on literature from the environmental sciences, security studies, and sociology to highlight the complex human insecurities that often accompany environmental change. As conceptualizations of security continue to shift and broaden to include environmental issues and concerns, it is imperative that gender informs the debate. *Environmental Discourse* Necdet Teymur, 1982

Environmental Discourses in Public and International Law Brad Jessup, Kim Rubenstein, 2014-05-14 The world is talking, pondering, and strategising about the environment. Ever more of the environment has been identified, publicly contemplated, or designated for despoliation and resource extraction. Remote and wild places like the rugged Australian Kimberley and the far reaches of North America are now subject to advanced plans for fossil fuel extraction. Environmental disasters including fires, floods, cyclones, earthquakes, and tsunamis, and schemes to alleviate or prevent future human suffering from catastrophe have occupied governmental and organisational attention. Meanwhile, concerns about environmental degradation and, in particular, human-induced climate change dominate Western media and national and international politics and are connecting communities through conversation and localised action. The nature, breadth, and extent of global responses to climate change are also points of contention between the developing and developed worlds. **Language of Environment, Environment of Language** Peter Mühlhäusler, 2003 Mühlhäusler has designed a text for use both as an introduction to the growing field of ecolinguistics and to add a linguistic perspective to environmental studies, environmental impact planning, ecotourism, and philosophy. [Climate Change Discourse in Russia](#) Marianna Poberezhskaya, Teresa Ashe, 2018-08-06 This book explores the development of climate change discourses in Russia. It contributes to the study of climate change as a cultural idea by developing the extensive Anglophone literature on environmental science, politics, and policy pertaining to climate change in the West to consider how Russian discourses of climate change have developed. Drawing on contributors specialising in numerous periods, regions, disciplines, and topics of study, the central thread of this book is the shared attempt to understand how environmental issues, particularly climate change, have been understood, investigated, and conceptualised in Soviet and post-Soviet Russia. The chapters aim to

complement work on the history of the discursive political construction of climate change in the West by examining a highly contrasting but intimately related cultural context Russia remains one of the world's largest greenhouse gas emitters with one of the most carbon intensive economies As the world begins to suffer the extreme consequences of anthropogenic climate change finding adequate solutions to global environmental problems necessitates the participation of all countries Russia is a central actor in this global process and it therefore becomes increasingly important to understand climate change discourse in this region Insights gained in this area may also be illuminating for examining environmental discourses in other resource rich regions of the world with alternative economic and political experiences to that of the West e.g China Middle East This book will be of great interest to students and scholars of Russian environmental policy and politics climate change discourses environmental communication and environment and sustainability in general

Non-governmental organizations and the sustainability of small and medium-sized enterprises in Peru Walter V. Castro Aponte, 2023-09-04 This book provides a better understanding of the changing roles of non governmental organizations NGOs in promoting sustainability of small and medium sized enterprises SMEs in Peru The book focuses on the domains of organic production business social responsibility and sustainable production The innovative study uses a combination of network and discourse analyses to identify the main patterns and shifts in the roles of NGOs in order to deal with sustainability and the market Two major contemporary sociological theories ecological modernization theory and network society theory are applied to frame the analysis The in depth analysis of international networks of NGOs operating in Peru provide valuable inputs in terms of changes in network and discourse patterns and consequently changing roles for NGOs Remarkably social movement liberal market and sustainability viewpoints are generating new networks and new discourses with a prominent position of national and international NGOs vis vis SMEs and in absence of the national state Next to the usual watchdog roles NGOs are developing roles of helper in order to answer to the market needs of SMEs The analyses challenges Castells scheme of space of flows versus space of place and suggests considering in ecological modernization theory both ecological rationality and social rationality in order to advance environmental governance of SMEs in developing countries particularly in Latin America

Environment & Planning, 2009 **Urban Water Supply and Governance in India** Satyapriya Rout, Ruth Kattumuri, 2022-05-15 This book investigates institutional dimensions of urban water supply in India with a specific focus on institutional capabilities to provide drinking water to urban households in an efficient equitable and sustainable manner This book has been developed through empirical research within the context of growing urbanisation and increasing water needs of Indian cities and the wider developmental goal of achieving universal and equitable access to safe and affordable water for all as envisaged in goal 6 of the SDGs This study revolves around three important aspects of urban water supply and governance Firstly it attempts to understand household water service delivery scenarios in urban India drawing from case studies based on our household survey in four cities Ahmedabad Bangalore Kochi and Hyderabad Secondly it examines the

question of existing socio economic inequality and access to water in an urban context in India While dealing with the issue of inequality and access to water it attempts to explore the question of whether access to water and water scarcity is socially neutral whilst also analysing the mechanisms employed by the urban poor to manage their daily water needs Thirdly this book explores the role of institutions for efficient and effective delivery of water in urban India The institutional analysis from a comparative perspective provides important insights to guide current reforms in domestic water supply in India especially in a neo liberal context The book is a valuable resource for academicians policy makers and practitioners involved in water governance in general and domestic drinking water supply in particular Besides it is of great interest to those working in the area of urban development urban planning and household water management The book is an outcome of a collaborative research project by the authors sponsored jointly by University Grants Commission UGC New Delhi and UK India Education and Research Initiative UKIERI
