Discoverer Of The North Pole The Story Of Robert E Peary:

Discovery of the North Pole by Commander Robert E. Peary, U.S.N. : Story of how this Great Arctic Explorer Discovered the North Pole, April 6, 1909 ... : Also, Dr. Frederick A. Cook's Story : His Claim to Have Reached the North Pole, April 21, 1908, was Rejected by the University of Copenhagen for Lack of Proof ...

Frederick Albert Cook, J. Martin (James Martin) Miller, Robert E. (Robert Edwin) Peary, 1909 Discovery of the North Pole James Martin Miller, 1909 The North Pole: Its Discovery in 1909 Under the Auspices of the Peary Arctic Club Robert Edwin

Peary, 1986-01-01 It may not be inapt to liken the attainment of the North Pole to the winning of a game of chess in which all the various moves leading to a favorable conclusion had been planned in advance long before the actual game began It was an old game for me a game which I had been playing for twenty three years with varying fortunes Always it is true I had been beaten but with every defeat came fresh knowledge of the game its intricacies its difficulties its subtleties and with every fresh attempt success came a trifle nearer what had before appeared either impossible or at the best extremely dubious began to take on an aspect of possibility and at last even of probability Every defeat was analyzed as to its causes in all their bearings until it became possible to believe that those causes could in future be guarded against and that with a fair amount of good fortune the losing game of nearly a quarter of a century could be turned into one final complete success It is true that with this conclusion many well informed and intelligent persons saw fit to differ But many others shared my views and gave without stint their sympathy and their help and now in the end one of my greatest unalloyed pleasures is to know that their confidence subjected as it was to many trials was not misplaced that their trust their belief in me and in the mission to which the best years of my life have been given have been abundantly justified But while it is true that so far as plan and method are concerned the discovery of the North Pole may fairly be likened to a game of chess there is of course this obvious difference in chess brains are matched against brains In the quest of the Pole it was a struggle of human brains and persistence against the blind brute forces of the elements of primeval matter acting often under laws and impulses almost unknown or but little understood by us and thus many times seemingly capricious freaky not to be foretold with any degree of certainty For this reason while it was possible to plan before the hour of sailing from New York the principal moves of the attack upon the frozen North it was not possible to anticipate all of the moves of the adversary Had this been possible my expedition of 1905 1906 which established the then farthest north record of 87° 6' would have reached the Pole But everybody familiar with the records of that expedition knows that its complete success was frustrated by one of those unforeseen moves of our great adversary in that a season of unusually violent and continued winds disrupted the polar pack separating me from my supporting parties with insufficient supplies so that when almost within striking distance of the goal it was necessary to turn back because of the imminent peril of starvation When victory seemed at last almost within reach I was blocked by a move which could not possibly have been foreseen and which when I encountered it I was helpless to meet And as is well

known I and those with me were not only checkmated but very nearly lost our lives as well But all that is now as a tale that is told This time it is a different and perhaps a more inspiring story though the records of gallant defeat are not without their inspiration And the point which it seems fit to make in the beginning is that success crowned the efforts of years because strength came from repeated defeats wisdom from earlier error experience from inexperience and determination from them all

Discoverer of the North Pole Marie Ahnighito Peary, 1959 This story tells how Robert E Peary grew up and the events that led him to the discovery of the North Pole

The North Pole Robert Edwin Peary, 1910 *Robert Peary and the Quest for the North Pole* Daniel E. Harmon, Dan Harmon, 2001 Examines the life and adventures of American explorer Robert Peary focusing on his attempts to be the first man to reach the North Pole in the early twentieth century

Exploring the North Pole: The Story of Robert Edwin Peary and Matthew Henson Josepha Sherman, 2006-03 The Arctic the far frozen north can be a very dangerous place for people to visit The Arctic is almost always bitter cold with temperatures that can go far below 50 F and be in total darkness for four months out of a year Terrible storms sweep across the ice and snow and great crevasses perilous openings in the ice can swallow the unlucky traveler By the early 1900s many expeditions had tried to reach the farthest point north the North Pole but all of them had failed Many explorers had died Tales spread that no one could reach the North Pole They warned that the land was cursed But in the early twentieth century two men decided to brave the Arctic again They were Americans Robert Peary and Matthew Henson And they were determined to do what no one had ever done They were going to reach the North Pole

Robert E. Peary - The North Pole Robert E. Peary, 2016-04-29 Robert Edwin Peary Sr was born on May 6 1856 in Cresson Pennsylvania The early death of his father when Peary was 3 dictated that he and his mother moved to Portland Maine His senior education took place at Bowdon College and he graduated in 1877 with a Civil Engineering degree For Peary his overriding ambition became the North Pole It was a dream that had also obsessed many others His first exploration attempt was Greenland in 1886 He managed just 100 miles before turning back In 1891 he broke his leg but the recuperation enabled him to more clearly define how to achieve his ambition Inuit survival techniques were now researched and this gave him valuable insight By 1892 he had established that Greenland was an island In his 1898 1902 expedition he claimed an 1899 visual discovery of Jesup Land west of Ellesmere Peary also achieved a farthest north for the western hemisphere in 1902 north of Canada s Ellesmere Island Peary s next expedition was supported by a 50 000 gift Peary used the money for a new ship The SS Roosevelt battled its way through the ice between Greenland and Ellesmere Island establishing an American hemisphere farthest north by ship The 1906 Peary System dogsled drive for the pole across the rough sea ice of the Arctic Ocean started from the north tip of Ellesmere at 83 north latitude The parties made well under 10 miles 16 km a day until they became separated by a storm Peary was without a companion sufficiently trained in navigation to verify his account from that point northward With insufficient food and with uncertainty about whether he could negotiate the ice between him and land he made the best possible dash and barely escaped with his

life off the melting ice On April 20 he was no further north than 86 30 latitude He claimed the next day to have achieved a Farthest North world record at 87 06 and returned to 86 30 without camping an implied trip of at least 72 nautical miles 133 km between sleeping even assuming direct travel with no detours There is little doubt that although greatly honoured for his expeditions that Peary was rather elastic with the truth For his final assault on the Pole Peary and 23 men including Ross Gilmore Marvin set off from New York City on July 6 1908 aboard the S S Roosevelt under the command of Captain Robert Bartlett They wintered near Cape Sheridan on Ellesmere Island and from Ellesmere departed for the pole on February 28 March 1 1909 This book relates that attempt on the North Pole Subsequent to the attempt Peary was promoted to the rank of captain in the Navy on October 20 1910 By his lobbying Peary was eventually recognized by Congress to have attained the pole not discoverer in deference to 1908 North Pole claimant Frederick Cook s supporters Peary was given the Thanks of Congress by a special act of March 3 1911 By a special act of Congress on March 30 1911 Peary was promoted to the rank of Rear Admiral in the Navy Civil Engineer Corps retroactive to April 6 1909 and retired the same day In early 1916 Peary became chairman of the National Aerial Coast Patrol Commission It advocated the use of aircraft in detecting warships and submarines off the U S coast Peary used his celebrity to promote the use of military and naval aviation which led directly to the formation of Naval Reserve aerial coastal patrol units during the First World War At the close of the First World War Peary proposed a system of eight air mail routes which became the genesis of the U S Postal Service s air mail system Admiral Robert Edwin Peary died in Washington D C on February 20 1920 He was buried in Arlington National Cemetery
