Discovering Everyday Things:

The Discovery of Things Wolfgang-Rainer Mann, 2020-11-10 Aristotle's Categories can easily seem to be a statement of a naive pre philosophical ontology centered around ordinary items Wolfgang Rainer Mann argues that the treatise in fact presents a revolutionary metaphysical picture one Aristotle arrives at by implicitly criticizing Plato and Plato's strange counterparts the Late Learners of the Sophist As Mann shows the Categories reflects Aristotle's discovery that ordinary items are things objects with properties Put most starkly Mann contends that there were no things before Aristotle The author's argument consists of two main elements First a careful investigation of Plato which aims to make sense of the odd sounding suggestion that things do not show up as things in his ontology Secondly an exposition of the theoretical apparatus Aristotle introduces in the Categories an exposition which shows how Plato's and the Late Learners metaphysical pictures cannot help but seem inadequate in light of that apparatus In doing so Mann reveals that Aristotle's conception of things now so engrained in Western thought as to seem a natural expression of common sense was really a hard won philosophical achievement Clear subtle and rigorously argued The Discovery of Things will reshape our understanding of some of Aristotle's and Plato's most basic ideas
