Discovering Mathematics With Maple An Interactive Exploration For Mathematicians Engineers And Econometricians:

Discovering Mathematics with Maple R J Stroeker, J F Kaashoek, 1999-04-01 *Discovering Mathematics with Maple* Roelof J. Stroeker, Johan F. Kaashoek, L. F. Hoogerheide, 1999 Discovering Mathematics with Maple R.J. Stroeker, J.F. Kaashoek, 2012-12-06 his book grew out of the wish to let students of econometrics get acquainted with the powerful techniques of computer algebra at an early stage in their curriculum As no textbook available at the time met our requirements as to content and presentation we had no other choice than to write our own course material The try out on a group of 80 first year students was not without success and after adding some necessary modifications the same material was presented to a new group of students of similar size the year after Some more adjustments were made and the final result now lies before you Working with computer algebra packages like Derive Mathematica and Maple over many years convinced us of the favourable prospects of computer algebra as a means of improving the student's understanding of the difficult concepts on which mathematical techniques are often based Moreover advanced mathematical education be it for mathematics itself or for mathematical statistics operations research and other branches of applied mathematics can greatly profit from the large amount of non trivial mathematical knowledge that is stored in a computer algebra system Admittedly the fact remains that many a tough mathematical problem such as solving a complicated non linear system or obtaining a finite expression for a multiple parameter integral can not easily be handled by computer algebra either if at all

Shingareva, Carlos Lizárraga-Celaya, 2009-08-14 In the history of mathematics there are many situations in which calculations were performed incorrectly for important practical applications Let us look at some examples

the history of computing the number began in Egypt and Babylon about 2000 years BC since then many mathematicians have calculated e g Archimedes Ptolemy Vi ete etc The rst formula for computing decimal digits of π was disc ered by J Machin in 1706 who was the rst to correctly compute 100 digits of π Then many people used his method e g W Shanks calculated with 707 digits within 15 years although due to mistakes only the rst 527 were correct For the next examples we can mention the history of computing the ne structure constant that was rst discovered by A Sommerfeld and the mathematical tables exact lutions and formulas published in many mathematical textbooks were not veri ed rigorously 25 These errors could have a large e ect on results obtained by engineers But sometimes the solution of such problems required such techn ogy that was not available at that time In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable Therefore the computers can be used to verify the results obtained by humans to discovery new results to provetheresultsthatahumancanobtainwithoutanytechnology With respectto our example of computing we can mention that recently in 2002 Y Kanada Y Ushiro H Kuroda and M The Maple Book Frank Garvan,2001-11-28 Maple is a very powerful computer algebra system used by students educators mathematicians statisticians scientists and engineers for doing numerical and symbolic computations Greatly expanded and updated from the author s MAPLE V Primer The MAPLE Book offers extensive coverage of the latest version of this outstanding software package MAPL **Maple in Mathematics Education and Research** Robert M.
