Compiled Labelled Deductive Systems Krysia Broda,2004 This book introduces a general framework called Compiled Labelled Deductive System CLDS for a unified presentation of logics It shows how this technique is applied to various families of non classical logics widely used in Computer Science and Artificial Intelligence It includes complete natural deduction proof systems together with proofs and examples for the families of propositional and predicate modal logics propositional conditional logics of normality multiplicative linear logic and for Lukasiewicz fuzzy logic The CLDS framework generalises the notion of a logical theory to a structured theory consisting of labelled formulas and relations between the labels This formalisation makes the logics more amenable to applications Moreover the framework provides a semantic approach based on a first order translation which can be uniformly applied to any logic whose semantics is first order axiomatisable Such a semantic approach also facilitates the development of automated theorem provers for non classical logics **Discover** ,1994-07 **Data Mining and Knowledge Discovery** ,2003 **Contributions to science** ,2001
