Discovering Old Cameras:

Discovering Old Cameras 1839-1939 Robert White, 2008-03-04 In 1839 the world heard that it was possible to capture the image by chemical means without the aid of the artist's hand. This book traces the development of the camera from its origins through the wet colodion period and the boom years for amateur photography which followed the introduction of fast dry plates in the 1880s and into the 1890s when roll films and commercial processing made snapshots possible. The twentieth century brought smaller even pocketable cameras which led in the 1920s and 1930s to the miniature camera using 35mm film.

Doing Experimental Media Archaeology Tim van der Heijden, Aleksander Kolkowski, 2022-12-31 In recent years there has been a growing interest in the use of experimental approaches to the study of media histories and their cultures. Doing media archaeological experiments such as historical re-enactments and hands-on simulations with media historical objects helps us to explore and better understand the workings of past media technologies and their practices of use. By systematically reflecting on the methodological underpinnings of experimental media archaeology as a relatively new approach in media historical research and teaching this book aims to serve as a practical handbook for doing media archaeological experiments. Doing Experimental Media Archaeology Practice is the twin volume to Doing Experimental Media Archaeology Theory authored by Andreas Fickers and Annie van den Oever.

The Cambridge Companion to Women in Music since 1900 Laura Hamer, 2021-05-06 This Companion explores women's work in music since 1900 across a broad range of musical genres and professions including the classical tradition, popular music and music technology. The crucial contribution of women to music education and the music industries features alongside their activity as composers and performers. The book considers the gendered nature of the musical profession in areas including access to training, gendered criticism, sexualization and notions of gender appropriate roles or instruments. It covers a wide range of women musicians such as Marin Alsop, Grace Williams, Billie Holiday, Joni Mitchell and Adele. Each thematic section concludes with a contribution from a practitioner in her own words reflecting upon the impact of gender on her own career. Chapters include suggestions for further reading on each of the topics covered providing an invaluable resource for students of Feminist Musicology, Women in Music and Music and Gender.
