Discovering Old Cameras 1839 1939:

Discovering Old Cameras 1839-1939 Robert White, 2008-03-04 In 1839 the world heard that it was possible to capture the image by chemical means without the aid of the artist's hand. This book traces the development of the camera from its origins through the wet colodion period and the boom years for amateur photography which followed the introduction of fast dry plates in the 1880s and into the 1890s when roll films and commercial processing made snapshots possible. The twentieth century brought smaller even pocketable cameras which led in the 1920s and 1930s to the miniature camera using 35mm film.

History of Photography Laurent Roosens, Luc Salu, 1989-01-01 The fourth volume in a history of photography this is a bibliography of books on the subject. *Controlling Language in Industry* Stephen Crabbe, 2017-01-30 This book provides an in depth study of controlled languages used in technical documents from both a theoretical and practical perspective. It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the information in technical documents. The author then offers a comparative analysis of existing controlled languages and distills the best practice features of those language systems. He concludes by offering innovative models that can be used to develop and trial a new controlled language. This book will be of interest to linguists working in technical and professional communication as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations.

The PhotoHistorian, 2002 Whitaker's Books in Print, 1998 *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004 *Fotografía y arquitectura en el siglo XIX* Helena Pérez Gallardo, 2015-06-18 Junto al análisis y la contextualización de la fotografía europea de arquitectura se destaca en este libro el importante papel ahora recuperado que tuvo en este género fotográfico la representación de la arquitectura española ya sea por medio de nuevos análisis de fotografías de referencia como Charles Clifford o Jean Laurent o a través del descubrimiento de otros completamente desconocidos hasta ahora de los que se reconstruyen sus trayectorias y obras.

Discovering Old Cameras Robert White, 1984 **Flammable Societies** John-Andrew McNeish, Owen Logan, 2012-01-06 The impact of the oil and gas industry paradoxically seen both as a blessing and a curse on socio economic development is a question at the heart of the comparative studies in this volume stretching from Northern Europe to the Caucasus the Gulf of Guinea to Latin America. Britain's transformation under Margaret Thatcher into a supposedly post industrial society orientated towards consumer sovereignty was paid for with revenues from the North Sea oil industry an industry conveniently out of sight and out of mind for many. Other case studies include resource struggles in Bolivia oil money in Venezuela and the Azerbaijani oil boom among many others. Drawing on bottom up research and theoretical reflection this book questions the political and scientific basis of current international policy that aims to address the problem of resource management through standard Western models of economic governance institution building and national sovereignty.
