**Civilization in the West** Mark A. Kishlansky, Patrick J. Geary, Patricia O'Brien, 2001 Civilization in the West blends social and political history into a fascinating narrative that brings history to life. The authors tell a compelling story of Western Civilization that is enhanced by an image-based approach. Pictorial chapter openers draw students in by illustrating a dominant theme of the chapter and exploring the dramatic impression each image makes in reinforcing that theme. The presentation of geography guides students around the changing contours of the West through both standard maps and Geographic Tours of Europe. The greater number of maps and tours combine to make this text the strongest possible program for teaching historical geography. 151 total maps as compared to Chambers the second highest at 106. Part 1 offers suggestions for enlivening classroom presentations. Part 2 addresses the problems of teaching students to write and part 2 focuses on history tests and exams including ways to construct and respond to essay questions.

*Civilizations of the West* Richard L. Greaves, Robert Zaller, 1994 **The West** Brian P. Levack, Michael Maas, Edward Muir, Meredith Veldman, 2004 *The West Encounters and Transformations* takes a new approach to telling the story of Western Civilization. Rather than looking at Western Civilization only as the history of Europe from ancient times to the present, this groundbreaking book examines the changing nature of the West: how the definition of the West has evolved and transformed throughout history. It explores the ways Western civilization has changed as a result of cultural encounters with different beliefs, ideas, technologies, and peoples both outside the West and within it. Presenting a balanced treatment of political, social, religious, and cultural history, this new text emphasizes the ever-shifting boundaries of the geographic and cultural realm of the West with special attention given to Eastern Europe and the Muslim world, Africa, Asia, and the Americas.
