Quinn, 1972 This volume presents the discovery and exploration of the North American continent from the earliest references down to the first permanent settlements as described by the explorers themselves and delineated by contemporary Europeans The vivid narratives of those who first sailed along its coasts penetrated the unknown interior with its primeval forests wide rivers and hostile inhabitants man and beast are richly supplemented by the drawings of the explorers and by the conceptions of the land which they brought back to European mapmakers and artists The geographical misconceptions of the discoverers strange and absurd as they seem to us now were exciting stimulating and often disastrous to the adventurers who came to seek wealth or freedom or glory in the new land The illustrations are taken from rare contemporary records manuscript and engraved maps and original paintings of the period Each section of the volume has an introductory historical essay which binds together the original narratives and the accompanying illustrations the possible pre Columbian explorations the emerging knowledge of the east coast from Cabot to Cartier the Spanish penetration of the southern interior and discoveries along the west coast the sixteenth century attempts at colonization the search for a North west Passage and the beginnings of permanent settlement in the early seventeenth century Among the early explorers some were officially appointed to make discoveries John Cabot who held a patent for his first voyage from Henry VII of England was one Others like Francis Drake on his voyage of 1578 9 were engaged in the opening up of trade although exploration and plunder were subsidiary activities The epic wanderings of the Spanish into the interior were stimulated by the lure of supposed immense riches like those already plundered from South America The narratives of these amazingly tenacious explorers such as de Soto and Coronado are in sharp contrast to those written by the men who came to colonize and settle At Fort Caroline the French colony under Laudonniere included the artist Le Moyne and the many engravings of his paintings reproduced with his own comments provide a lively picture of Indian life

and customs From the English settlement of 1585 in Virginia come the paintings of John White and the accompanying notes of Thomas Harriot settler mathematician and scientist But the hope of finding a shorter route to Cathay and the Spice Islands was so persistent that men like Frobisher and Davis made several voyages to the far north in search of a North west Passage and Henry Hudson died in that search The book is an Anglo American partnership the authors are authorities in their fields Professor W P Cumming is the author of *The Southeast in early maps* and numerous other books and articles on colonial American history and cartography as Guggenheim Fellow he spent a year in European libraries and archives searching for and examining documents and maps relating to the colonial period of North America The late Dr R A Skelton former superintendent of the British Museum Map Room long honorary secretary of the Hakluyt Society editor of *Imago Mundi* was the author of *Explorers Maps The Vinland Map* and other works His sudden death occurred within a week of his final examination of the proofs of this work and it ended a career which established his pre eminence throughout the world in the history of exploration and cartography Professor D B Quinn Andrew Geddes and John Rankin Professor of Modern History at Liverpool University is an authority on the history of discovery and has written numerous books and articles including *Sir Humphrey Gilbert and The Roanoke Voyages* for the Hakluyt Society Publisher

**The Discovery of North America Twenty Years Before Columbus** Sofus Larsen, 1925     The European Discovery of America: The northern voyages, A.D. 500-1600 Samuel Eliot Morison, 1971 The late Samuel Eliot Morison a former U S Navy admiral was also one of America s premier historians Combining a first hand knowledge of the sea and transatlantic travel with a brilliantly readable narrative style he produced what has become nothing less than the definitive account of the great age of European exploration In his riveting and richly illustrated saga Morison offers a comprehensive account of all the known voyages by Europeans to the New World from 500 A D to the seventeenth century Together the two volumes of *The European Discovery of America* tell the compelling stories of the many intrepid explorers who made what was then a journey fraught with danger figures as diverse as Leif Ericsson Columbus John Cabot Jacques Cartier Martin Frobisher Magellan Sir Walter Raleigh and Sir Francis Drake to name but a few They also follow the adventures of lesser known but no less interesting mariners and offer a detailed look at those who set them forth on their travels In the first volume *The Northern Voyages* winner of the prestigious Bancroft Prize for History Morison re creates the lives and perilous times of those who claimed to have seen the shores of North America in the 600 years after the Norsemen first landed He brings to his account a rare immediacy making the drama and unpredictability of their voyages as significant in relation to the people of their era as the astronauts journeys have been for our own times Morison also offers a fascinating look at the imaginary lands reported by early travelers such mythical places as Antilia and the Seven Cities the

glorious Kingdoms of Norumbega and Saguenay and Hy Brasil the Isle of the Blest and examines as well the alleged discoverers of these lands With warmth and wit he distinguishes fact from fiction and imaginary explorers and their exploits from actual men and events In the second volume Morison turns his attention to the navigators who negotiated the waters of the Caribbean and the treacherous coasts of South America even following them as they ventured ashore to the dark inland of the southern continent The Southern Voyages begins with the events leading up to Columbus s arrival in San Salvador in 1492 and concludes with the discovery of the southernmost bit of land Cape Horn by Dutch explorers in 1616 In between Morison retraces the routes of all the great mariners including a step by step account of Magellan s voyage that would take him around the world Morison has enlivened his narrative with a wide range of source material from Italy Spain Portugal and South America in the process shedding new light on questions that have divided scholars throughout history Did Sir Francis Drake discover San Francisco Bay Was Amerigo Vespucci a great explorer or a fraud or a little of both What role did the French have in the European discovery of Brazil Each volume brims with contemporary illustrations maps many of them specially drawn for this history and photographs often taken by Morison himself as he flew at low altitude along the coastal routes of explorers which together identify virtually every allusion to land and sea made by the great European navigators in their ship logs and their later accounts With the 500th anniversary of the European arrival in America came much controversy over Columbus s true legacy With its lively and engaging style and with its unsurpassed understanding of the age The European Discovery of America helps put the era of exploration in much needed perspective Anyone interested in the history of America indeed in the history of Western Civilization will find these volumes absolutely essential [America as Seen by Its First Explorers](#) John Bakeless,1989-01-01 Recreates the experiences of the people who first discovered and explored North America *Explorers and Their Quest for North America* Philip J.
