Employment Discrimination Law Barbara Lindemann, Paul Grossman, C. Geoffrey Weirich, 2020 Each of the treatise's 44 chapters provides a thorough treatment of the boundless issues that arise in the complex field of employment discrimination law. The authors and editors, practitioners in the field of employment discrimination law on behalf of management, employees, unions, and the government respectively, as well as professors of law in this field, produced this Sixth Edition to update and organize the growing body of law and to provide an ordered and balanced discourse on the numerous statutes, regulations, and leading cases that govern the day-to-day relations between employers and employees. This treatise focuses primarily on the law of Title VII as amended by the Civil Rights Act of 1991, the Equal Pay Act, EPA, the Age Discrimination in Employment Act (ADEA), Sections 1981 and 1983 of the Civil Rights Act of 1866 as related to employment discrimination, the Americans with Disabilities Act (ADA) as amended by the Americans with Disabilities Act Amendments Act of 2008 (ADAAA), and the Rehabilitation Act. The treatise also addresses other rules and statutes such as the Genetic Information Nondiscrimination Act of 2008 (GINA), the Family and Medical Leave Act of 1993 (FMLA), and the Uniformed Services Employment and Reemployment Rights Act (USERRA) but claims under the above seven main statutes account for the overwhelming majority of federal employment discrimination litigation. The authors and editors have continued the approach originally embraced in the Fifth Edition, emphasizing decisions by the U.S. Courts of Appeals rather than opinions rendered by the U.S. District Courts. District court decisions are cited in instances where they constitute an important part of the developing case law, such as under newer statutes and in fields such as procedure and evidence where there is a natural paucity of appellate authority.

Cases and Materials on Employment Discrimination Law Samuel Estreicher, Michael C. Harper, 2004 This law school casebook presents updated materials on employment discrimination law. The book provides a text for a comprehensive course on substantive and procedural law, including in-depth analysis of models of proof under Title VII as well as of the special problems presented by the regulation of sex, age, disability, and retaliatory discrimination. The book also highlights procedural systems under Title VII, the Age Discrimination in Employment Act (ADEA), and the Americans with Disabilities Act (ADA), as well as issues of coordination between private arbitration and federal and state regulation.

Employment Discrimination Law Robert Belton, Dianne Avery, 1999 *Handbook of Employment Discrimination Research* Laura Beth Nielsen, Robert L. Nelson, 2006-01-01 There is much to understand about employment discrimination law as a social system. What drives the growing trend toward litigation? To what extent does discrimination persist, and why does it vary by organizational and market context? How do different groups perceive discrimination, and what, if anything, do they do about it? How do employers respond to discrimination law? What is the effect of broader political and legal currents? What is the relationship between anti-discrimination law and social inequality? This book presents answers from a distinguished group of scholars and social scientists, offering a broad reconsideration of employment discrimination and its treatment in law.
