Disestablishing The School Debunking Jus:

The Public School Advantage Christopher A. Lubienski, Sarah Theule Lubienski, 2013-11-07 Nearly the whole of America's partisan politics centers on a single question: Can markets solve our social problems? And for years this question has played out ferociously in the debates about how we should educate our children. From the growth of vouchers and charter schools to the implementation of No Child Left Behind, policy makers have increasingly turned to market-based models to help improve our schools, believing that private institutions, because they are competitively driven, are better than public ones. With *The Public School Advantage*, Christopher A. and Sarah Theule Lubienski offer powerful evidence to undercut this belief, showing that public schools, in fact, outperform private ones. For decades, research showing that students at private schools perform better than students at public ones has been used to promote the benefits of the private sector in education, including vouchers and charter schools, but much of this data is now nearly half a century old. Drawing on two recent large-scale and nationally representative databases, the Lubienskis show that any benefit seen in private school performance now is more than explained by demographics. Private schools have higher scores not because they are better institutions, but because their students largely come from more privileged backgrounds that offer greater educational support. After correcting for demographics, the Lubienskis go on to show that gains in student achievement at public schools are at least as great and often greater than those at private ones. Even more surprising, they show that the very mechanism that market-based reformers champion—autonomy—may be the crucial factor that prevents private schools from performing better. Alternatively, those practices that these reformers castigate, such as teacher certification and professional reforms of curriculum and instruction, turn out to have a significant effect on school improvement. Despite our politics, we all agree on the fundamental fact: education deserves our utmost care. *The Public School Advantage* offers exactly that. By examining schools within the diversity of populations in which they actually operate, it provides not ideologies but facts. And the facts say it clearly: education is better off when provided for the public by the public.

[Debating Education](#) David Schmidtz, Harry Brighouse, 2020 *Debating Education* puts two leading scholars in conversation with each other on the subject of education, specifically what role, if any, markets should play in policy reform. David Schmidtz and Harry Brighouse each advance nuanced arguments and respond to each other, presenting contrasting views on education as a public good. Schmidtz argues on behalf of a market-driven approach, making the case that educational opportunities do not need to be equal in order to be good. The ideal of education is not equally preparing students to win a race, but maximally preparing each student to make a contribution. Harry Brighouse, instead, focuses on inequality, particularly the unequal distribution of rewards. He argues that justice requires prioritizing the prospects of the bottom 30% of the population, whose life prospects are much worse than justice would demand given the current wealth of society. The moral imperative of education should be to improve this group's range of opportunities. Brighouse expresses serious skepticism that market mechanisms are capable of this task, due to

imperfections in educational markets a lack of appropriate regulations political influence and other systemic obstacles At its heart Debating Education is concerned with the nature function and legitimate scope of voluntary exchange as a form of social relation and how education raises concerns that are not at issue when it comes to trading relationships between consenting adults It will appeal to scholars and students of ethics alike specifically those who study political philosophy philosophy of education as well as individuals interested in educational and public policy Social Life and Moral Judgment Antony Flew,2017-12-02 In Social Life and Moral Judgment author and philosopher Antony Flew examines the social problems induced by the mature welfare state Welfare states make ever increasing financial demands on their citizenry yet the evidence clearly supports that such demands are not sustainable In this superlative collection of thematic essays Flew investigates and explains why this is so and calls for a return to individual responsibility The first essay establishes the philosophical basis for his argument Is Human Sociobiology Possible answers its titular question in the negative asserting that we are all members of a peculiar type of creature that can and therefore must be responsible for whatever choices between various courses of action or inaction that are open to us as individuals In other essays Flew shows how state welfare systems inevitably corrupt and demoralize their citizens by encouraging ever more people to apply for welfare entitlements and reducing the incentives to avoid or escape the conditions warranting those entitlements He investigates the origins of this new kind of welfare entitlement and shows how very different what politicians and public sector employees produce is from what these people claim to be producing Flew shows that the drive for social justice appears to require that the justly acquired income and wealth of all citizens should be progressively taxed away or supplemented by the state so that the eventual result is more though never perfect equality This objective he asserts must be radically distinguished from old fashioned without prefix or suffix justice It was this type of justice Adam Smith referred to when he famously said that it is a virtue of which the observance is not left to the freedom of our wills but which may be extorted by force Flew question the aims of those who would discredit wealth creators and wealth creating investment showing that these are the same people who prom
