*Disinfection of Wastewater and Water for Reuse* George Clifford White,1978      *Safe Application of Reclaimed Water Reuse in the Southwestern United States* Laosheng Wu,2009      *Wastewater Reclamation, Recycling and Reuse* F. Brissaud,2001-04-30 This issue contains a selection of 43 papers presented at the 3rd International Symposium in Paris Several papers from Asia and Europe offer national experiences and perspectives on water reuse Project planning problems pitfalls and keys to success are discussed through examples from Australia the United States and Europe Wastewater reuse is acknowledged as a basic component of integrated water resources management and its environmental impact is taken into account in economic evaluations      Water Reuse National Research Council,Division on Earth and Life Studies,Water Science and Technology Board,Committee on the Assessment of Water Reuse as an Approach to Meeting Future Water Supply Needs,2012-07-17 Expanding water reuse the use of treated wastewater for beneficial purposes including irrigation industrial uses and drinking water augmentation could significantly increase the nation s total available water resources Water Reuse presents a portfolio of treatment options available to mitigate water quality issues in reclaimed water along with new analysis suggesting that the risk of exposure to certain microbial and chemical contaminants from drinking reclaimed water does not appear to be any higher than the risk experienced in at least some current drinking water treatment systems and may be orders of magnitude lower This report recommends adjustments to the federal regulatory framework that could enhance public health protection for both planned and unplanned or de facto reuse and increase public confidence in water reuse      **Handbook of Drought and Water Scarcity** Saeid Eslamian,Faezeh A. Eslamian,2017-07-20 This volume includes over 30 chapters written by experts from around the world It examines the environmental aspects of drought such as groundwater and soil contamination river low flow urban water quality and desertification It also examines the effects of climate change and variability on drought and discusses the differences in groundwater rainfall and temperatures and their related effects It presents analytical modeling for better understanding drought in uncertain and changing climates      *Wastewater Treatment and Reuse Theory and Design Examples, Volume 2:* Syed R. Kimber, 2008-05-14 Water Reuse An International Survey of current practice issues and needs examines water reuse practices around the world from different perspectives The objective is to show how differently wastewater reuse is conceived and practised around the world as well as to present the varied needs and possibilities for reusing wastewater In the first section water reuse practices around the world are described for regions having common water availability reuse needs and social aspects The second section refers to the stakeholders point of view Each reuse purpose demands different water quality not only to protect health and the environment but also to fulfil the requirements of the specific reuse Reuses considered are agricultural urban agriculture as a special case of the former municipal and industrial Alongside these uses the indirect reuse for human consumption through aquifer recharge is also discussed The third section deals with emerging and controversial topics Ethical and economical dilemmas in the field are presented as a subject not frequently addressed in this field The role of governments in respect of public policy in reuse is discussed as well as the different international criteria and standards for reusing wastewater The importance of public acceptance and the way to properly handle it is also considered The fourth section of the book presents contrasting case studies typical situations in the developed world Japan and Germany are compared to those in developing countries Pakistan and Brazil for agricultural and industrial reuse Indirect planned reuse for human consumption Germany is compared with an unplanned one Mexico The Windhoek Namibia case study is presented to emphasize why if the direct reuse of wastewater for human consumption has been performed with success for more than 35 years it is still the only example of this type around the world To illustrate the difficulties of having a common framework for regulating water reuse in several countries the Mediterranean situation is described Other case studies presented refer to the reuse situation in Israel Spain Cameroon Nepal and Vietnam these latter countries being located in water rich areas This book will be an invaluable information source for all those concerned with water reuse
