Dismembering The State The Death Of Yugoslavia And Why It Matters:

Dismembering the State P. H. Liotta, 2001-01-01 P H Liotta's previous book *The Wreckage Reconsidered* was acclaimed as a tour de force of scholarship. In *Dismembering the State* Liotta continues to challenge numerous assumptions about the disintegration of Yugoslavia. His research uses an ecological or holistic perspective to address interwoven questions such as the role of military intervention as coercive diplomacy, the use of chaos as a strategy against America's and NATO's technological military predominance and the influence of post Cold War European democratic and economic reforms. This book considers how a host of factors from 1991 to 1999 combined to contribute significantly to both the disintegration of the nation state and to the continued instability of the present states of the former Yugoslavia. Of interest to both scholars and sophisticated lay readers, Liotta has fashioned a scholarly assessment of this timely and complex topic that promises to be as innovative as it is erudite.

Regime Change in the Yugoslav Successor States Mieczysław P. Boduszynski, 2010-04-26 In the 1990s amid political upheaval and civil war the Socialist Federal Republic of Yugoslavia dissolved into five successor states. The subsequent independence of Montenegro and Kosovo brought the total number to seven. Balkan scholar and diplomat to the region Mieczyslaw P Boduszynski examines four of those states: Croatia, Slovenia, Macedonia and the Federal Republic of Yugoslavia and traces their divergent paths toward democracy and Euro Atlantic integration over the past two decades. Boduszynski argues that regime change in the Yugoslav successor states was powerfully shaped by both internal and external forces: the economic conditions on the eve of independence and transition and the incentives offered by the European Union and other Western actors to encourage economic and political liberalization. He shows how these factors contributed to differing formulations of democracy in each state. The author engages with the vexing problems of creating and sustaining democracy when circumstances are not entirely supportive of the effort. He employs innovative concepts to measure the quality of and prospects for democracy in the Balkan region, arguing that procedural indicators of democratization do not adequately describe the stability of liberalism in post communist states. This unique perspective on developments in the region provides relevant lessons for regime change in the larger post communist world. Scholars, practitioners and policymakers will find the book to be a compelling contribution to the study of comparative politics, democratization and European integration.

New Media, Old Regimes Lyombe S. Eko, 2012-07-30 *New Media Old Regimes: Case Studies in Comparative Communication Law and Policy* by Lyombe S Eko is a collection of novel theoretical perspectives and case studies which illustrate how different communication law regimes conceptualize and apply universal ideals of human rights and freedom of expression to media controversies in real space and cyberspace. Eko's investigation includes such controversial communication policy topics as North African regimes' failed use of telecommunications to suppress the social change of the Arab Spring, the Mohammad cartoon controversy in Denmark and France, French and American policy of development and diffusion of the Minitel and the Internet, American and Russian regulation of internet surveillance, the

problem of managing pedopornography in cyberspace and real space and other current communication policy cases This study will aid readers not only to understand different national and cultural perspectives of thorny communication issues but also show that though freedom of expression is a pluralistic concept the actions of all political regimes at the national transnational and international levels must be held up to the universal standards of freedom of expression set forth in the Universal Declaration of Human Rights New Media Old Regimes provides essential scholarship on comparative communication law and policy in a world of new media

Communications and the law, 2002 **International State-building After Violent Conflict** Marc Weller, Stefan Wolff, 2008 Previously published as a special issue of *Ethnopolitics* this volume analyzes various dimensions of the internationalized state building process in Bosnia and Herzegovina since 1995 In December 1995 the Dayton Agreements ended the war in Bosnia and Herzegovina and established a fragile peace between the former conflict parties The settlement seemed morally wrong and politically impracticable but still necessary in order to end violence of a scale and intensity not seen in Europe since the end of the Second World War The leading contributors conclude that internationalized state building can only serve well in the stabilization of states emerging from conflict if it draws on a well balanced approach of consociational techniques moderated by integrative policies tempered by a wider regional outlook and sustained by resourceful and skilled international involvement The experience of Bosnia and Herzegovina may not have scored full marks in all of these categories but important lessons can be gleaned for other similar contemporary and future challenges that the international community no doubt will have to face This book will be of interest to students and scholars of international organizations civil wars and ethnic conflicts international law and peace studies
