Disciplining Reproduction Modernity American Life Sciences And The Problem Of Sex:

Disciplining Reproduction Adele E. Clarke, 2022-03-25 Reproductive issues from sex and contraception to abortion and cloning have been controversial for centuries and scientists who attempted to turn the study of reproduction into a discipline faced an uphill struggle Adele Clarke's engrossing story of the search for reproductive knowledge across the twentieth century is colorful and fraught with conflict Modern scientific study of reproduction human and animal began in the United States in an overlapping triad of fields biology medicine and agriculture Clarke traces the complicated paths through which physiological approaches to reproduction led to endocrinological approaches creating along the way new technoscientific products from contraceptives to hormone therapies to new modes of assisted conception for both humans and animals She focuses on the changing relations and often uneasy collaborations among scientists and the key social worlds most interested in their work major philanthropists and a wide array of feminist and medical birth control and eugenics advocates and recounts vividly how the reproductive sciences slowly acquired standing By the 1960s reproduction was disciplined and the young and contested scientific enterprise proved remarkably successful at attracting private funding and support But the controversies continue as women the targeted consumers create their own reproductive agendas around the world Elucidating the deep cultural tensions that have permeated reproductive topics historically and in the present *Disciplining Reproduction* gets to the heart of the twentieth century's drive to rationalize reproduction human and nonhuman in order to control life itself This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1998

Biology and Ideology from Descartes to Dawkins Denis R.

Alexander, Ronald L. Numbers, 2010-05-15 Over the course of human history the sciences and biology in particular have often been manipulated to cause immense human suffering For example biology has been used to justify eugenic programs forced sterilization human experimentation and death camps all in an attempt to support notions of racial superiority By investigating the past the contributors to *Biology and Ideology from Descartes to Dawkins* hope to better prepare us to discern ideological abuse of science when it occurs in the future Denis R Alexander and Ronald L Numbers bring together fourteen experts to examine the varied ways science has been used and abused for nonscientific purposes from the fifteenth century to the present day Featuring an essay on eugenics from Edward J Larson and an examination of the progress of evolution by Michael J Ruse *Biology and Ideology* examines uses both benign and sinister ultimately reminding us that ideological extrapolation continues today An accessible survey this collection will enlighten historians of science their students practicing scientists and anyone interested in the relationship between science and culture
