Discontinuous Groups And Riemann Surfaces:

Discontinuous Groups and Riemann Surfaces (AM-79), Volume 79 Leon Greenberg, 2016-03-02 Study 79 contains a collection of papers presented at the Conference on Discontinuous Groups and Riemann Surfaces at the University of Maryland May 21-25 1973. The papers by leading authorities deal mainly with Fuchsian and Kleinian groups, Teichmüller spaces, Jacobian varieties and quasiconformal mappings. These topics are intertwined representing a common meeting of algebra, geometry and analysis. DISCONTINUOUS GROUPS AND RIEMANN SURFACES- PAPERS READ AT A CONFERENCE ANNALS OF MATHEMATICS STUDIES, **Discontinuous Groups and Automorphic Functions** Joseph Lehner, 1964-12-31 Much has been written on the theory of discontinuous groups and automorphic functions since 1880 when the subject received its first formulation. The purpose of this book is to bring together in one place both the classical and modern aspects of the theory and to present them clearly and in a modern language and notation. The emphasis in this book is on the fundamental parts of the subject. The book is directed to three classes of readers: graduate students approaching the subject for the first time; mature mathematicians who wish to gain some knowledge and understanding of automorphic function theory; and experts.

Differential Geometry and Complex Analysis I. Chavel, H.M. Farkas, 2012-12-06 This volume is dedicated to the memory of Harry Ernest Rauch who died suddenly on June 18 1979. In organizing the volume we solicited: i) articles summarizing Rauch's own work in differential geometry, complex analysis and theta functions; ii) articles which would give the reader an idea of the depth and breadth of Rauch's researches, interests and influence in the fields he investigated; and iii) articles of high scientific quality which would be of general interest. In each of the areas to which Rauch made significant contribution—pinching theorems, Teichmüller theory and theta functions as they apply to Riemann surfaces—there has been substantial progress. Our hope is that the volume conveys the originality of Rauch's own work, the continuing vitality of the fields he influenced, and the enduring respect for and tribute to him and his accomplishments in the mathematical community. Finally, it is a pleasure to thank the Department of Mathematics of the Graduate School of the City University of New York for their logistical support; James Rauch who helped us with the biography; and Springer Verlag for all their efforts in producing this volume. Isaac Chavel, Hershel M. Farkas. Contents: Harry Ernest Rauch: Biographical Sketch; VII Bibliography of the Publications of H. E. Rauch; X Ph.D. Theses Written under the Supervision of H. E. Rauch; XIII H. E. Rauch: *Geometrie Differentielle* by M. Berger.

Foundations of Hyperbolic Manifolds John Ratcliffe, 2013-03-09 This book is an exposition of the theoretical foundations of hyperbolic manifolds. It is intended to be used both as a textbook and as a reference. Particular emphasis has been placed on readability and completeness of argument. The treatment of the material is for the most part elementary and self-

contained The reader is assumed to have a basic knowledge of algebra and topology at the first year graduate level of an American university The book is divided into three parts The first part consisting of Chapters 1-7 is concerned with hyperbolic geometry and basic properties of discrete groups of isometries of hyperbolic space The main results are the existence theorem for discrete reflection groups the Bieberbach theorems and Selberg's lemma The second part consisting of Chapters 8-12 is devoted to the theory of hyperbolic manifolds The main results are Mostow's rigidity theorem and the determination of the structure of geometrically finite hyperbolic manifolds The third part consisting of Chapter 13 integrates the first two parts in a development of the theory of hyperbolic orbifolds The main results are the construction of the universal orbifold covering space and Poincaré's fundamental polyhedron theorem

Geometry and Spectra of Compact Riemann Surfaces Peter Buser, 2010-10-29 This monograph is a self-contained introduction to the geometry of Riemann Surfaces of constant curvature 1 and their length and eigenvalue spectra It focuses on two subjects the geometric theory of compact Riemann surfaces of genus greater than one and the relationship of the Laplace operator with the geometry of such surfaces Research workers and graduate students interested in compact Riemann surfaces will find here a number of useful tools and insights to apply to their investigations

Foundations of Hyperbolic Manifolds John G. Ratcliffe, 2019-10-23 This heavily class tested book is an exposition of the theoretical foundations of hyperbolic manifolds It is both a textbook and a reference A basic knowledge of algebra and topology at the first year graduate level of an American university is assumed The first part is concerned with hyperbolic geometry and discrete groups The second part is devoted to the theory of hyperbolic manifolds The third part integrates the first two parts in a development of the theory of hyperbolic orbifolds Each chapter contains exercises and a section of historical remarks A solutions manual is available separately

Mathematics Going Forward Jean-Michel Morel, Bernard Teissier, 2023-05-13 This volume is an original collection of articles by 44 leading mathematicians on the theme of the future of the discipline The contributions range from musings on the future of specific fields to analyses of the history of the discipline to discussions of open problems and conjectures including first solutions of unresolved problems Interestingly the topics do not cover all of mathematics but only those deemed most worthy to reflect on for future generations These topics encompass the most active parts of pure and applied mathematics including algebraic geometry probability logic optimization finance topology partial differential equations category theory number theory differential geometry dynamical systems artificial intelligence theory of groups mathematical physics and statistics
