Descartes Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences by Rene Descartes The Discourse on the Method French Discours de la methode is a philosophical and autobiographical treatise published by Ren Descartes in 1637 Its full name is Discourse on the Method of Rightly Conducting One's Reason and of Seeking Truth in the Sciences French title Discours de la methode pour bien conduire sa raison et chercher la verite dans les sciences The Discourse on The Method is best known as the source of the famous quotation Je pense donc je suis I think therefore I am which occurs in Part IV of the work Good sense is of all things among men the most equally distributed for every one thinks himself so abundantly provided with it that those even who are the most difficult to satisfy in everything else do not usually desire a larger measure of this quality than they already possess And in this it is not likely that all are mistaken the conviction is rather to be held as testifying that the power of judging aright and of distinguishing truth from error which is properly what is called good sense or reason is by nature equal in all men and that the diversity of our opinions consequently does not arise from some being endowed with a larger share of reason than others but solely from this that we conduct our thoughts along different ways and do not fix our attention on the same objects For to be possessed of a vigorous mind is not enough the prime requisite is rightly to apply it The greatest minds as they are capable of the highest excellences are open likewise to the greatest aberrations and those who travel very slowly may yet make far greater progress provided they keep always to the straight road than those who while they run forsake it **Discourse on Method and Related**

of the famous quotation *Je pense donc je suis* I think therefore I am which occurs in Part IV of the work *Discourse on the Method* is one of the most influential works in the history of modern philosophy and important to the development of natural sciences In this work Descartes tackles the problem of skepticism which had previously been studied by Sextus Empiricus Al Ghazali and Michel de Montaigne Descartes modified it to account for a truth he found to be incontrovertible Descartes started his line of reasoning by doubting everything so as to assess the world from a fresh perspective clear of any preconceived notions Rene Descartes 1596 1650 was a French philosopher mathematician and scientist Dubbed the father of modern western philosophy much of subsequent Western philosophy is a response to his writings which are studied closely to this day He spent about 20 years of his life in the Dutch Republic RENE DESCARTES was born at La Haye in Touraine March 31 1596 He came of a landed family with possessions in Brittany as well as in the south His education was begun at the Jesuit College of La Fleche continued at Paris and completed by travel in various countries and his studies were varied by several years of military service After he began to devote himself to philosophy he lived chiefly in Holland but the last five months of his life were spent in Stockholm at the court of Queen Christina of Sweden where he died on February 11 1650 While still young Descartes had become profoundly dissatisfied with the scholastic philosophy which still survived in the teaching of the Jesuits from whom he received his early training and adopting a skeptical attitude he set out on his travels determined to gain knowledge only from himself and the great book of the world from nature and the observation of man It was in Germany as he tells us that there came to him the idea which proved the starting point of his whole system of thought the idea I think therefore I exist which called a halt to the philosophical doubt with which he had resolved to regard everything that could conceivably be doubted On this basis he built up a philosophy which is usually regarded as the foundation of modern thought Not that the system of Descartes is accepted to day but the sweeping away of presupposition of all kinds and the method which he proposed for the discovery of truth have made possible the whole modern philosophic development It was in the *Discourse* here printed originally published in 1637 that this method was first presented to the world
