

His discussion of earlier controversies surrounding the works of Kumashiro Tatsumi (*The Four-and-a-Half Mat Room*), Takechi Tetsuji (*Black Snow*), and, in general, Nikkatsu Studio's *roman porno* genre show a critic with a keen eye for the hypocrisies and contradictions surrounding official Japan's attempts to regulate sexual expression in the popular media. Oshima's claim, for instance, that for a year and a half after its initial release in Paris, the full version of *In the Realm of the Senses* played to huge crowds of Japanese tourists is offered with more than a hint of cynicism. "Isn't it ludicrous," he wonders, "that the same Japanese who are unable to see something in Japan are able to see it in a foreign country?" (p. 266).

Among the essays that range beyond the cinema are Oshima's fascinating descriptions of his visits to Korea and Vietnam in the middle 1960s. In particular, the essay "The People of 'The Forgotten Imperial Army,'" which discusses a television documentary Oshima made about Koreans who fought as part of the Japanese army in the Pacific War, has great relevance for ongoing discussions in Japan and Korea about Japanese actions during the war. There are also a handful of autobiographical musings available here, including a few about his childhood, that give some feel for the man behind the scenes of a number of penetrating studies of Japanese youth.

Although the primary audience for this book is surely those with some interest in and knowledge of Japanese cinema, excellent annotations in the form of footnotes will help guide the novice through the terrain of Oshima's cinematic references. Provided by Hideo Suzuki, these notes are quite deft and reveal an extraordinary knowledge. The book is relatively error-free as well. Surely the most egregious of these is the misspelling of this reviewer's last name at the bottom of the very first page. After this error, however, the book is a genuine joy, a major contribution to our continued attempts to come to terms with one of the world's most vital and exciting national cinemas.

*Dismantling Communism: Common Causes and Regional Variations.* Edited by GILBERT ROZMAN. Washington, D.C.: The Woodrow Wilson Center Press, 1992. viii, 405 pp. \$38.00.

The scholarship in this comparative anthology is solid and dependable. The breadth is commendable and the themes are important. The information is current and should remain so for a good while. The quality is consistent. This book could well be used as a best example of its important genre for graduate students, and selected articles could be used in upper division undergraduate classes.

The theme is true to the title—dismantling communism. The comparisons center on the USSR and China, but Poland, Hungary, the German Democratic Republic, Czechoslovakia, Hungary, Vietnam, Mongolia, and North Korea receive significant attention. Some socialist or formerly socialist countries are only discussed in passing, notably the Soviet successor states other than Russia and those in southeast Europe, cases that might be significant in some comparative analyses, but so many countries are included here that it would be churlish to complain.

After two broadly comparative chapters, seven follow on "regional variations" and two on foreign policy. All chapters tend to draw broad comparisons, sketch the big picture, and develop macrolevel analyses. The chapters on "regional variations" offer broad overviews, often discussing variations within a region within the context
