Discourse On Metaphysics And The Monadology Dover Philosophical Classics Paperback:

Discourse on Metaphysics and The Monadology G. W. Leibniz, 2012-03-09 One of the seventeenth century's most important thinkers Gottfried Wilhelm Leibniz exercised enormous influence on the philosophy of Herder Feuerbach and Hegel as well as on the writings of Schiller and Goethe Two of Leibniz's most studied and often quoted works appear in this volume *Discourse on Metaphysics* and *The Monadology* Published in 1686 the *Discourse on Metaphysics* consists of Leibniz's expansion of a letter to his theologian friend Antoine Arnauld in which he explains that through our perceptions we express the rest of the universe from our own unique perspectives The whole world is thus contained in each individual substance as each represents the same universe and the universe is in a way multiplied as many times as there are substances and similarly the glory of God is redoubled by as many completely different representations of His work It is here that Leibniz makes his famous assertion that God with perfect knowledge and goodness freely chose to create this the best of all possible worlds The *Monadology* written in 1714 offers a concise synopsis of Leibniz's philosophy It establishes the laws of final causes which underlie God's free choice to create the best possible world a world that serves as dynamic and perfectly ordered evidence of the wisdom power and benevolence of its creator *Discourse on metaphysics, correspondence with Arnauld, and Monadology* Gottfried Wilhelm Leibniz, 1902 *Discourse on Metaphysics ; Correspondence with Arnauld ; And, Monadology* Gottfried Wilhelm Freiherr von Leibniz, 1950 *Discourse on Metaphysics* Gottfried Wilhelm Freiherr von Leibniz, 1945 **Discourse on Metaphysics** Gottfried Wilhelm Freiherr von Leibniz, 1968 *Discourse on Metaphysics and Other Essays* Gottfried Wilhelm Freiherr von Leibniz, 1991-01-01 *Discourse on Metaphysics and Other Essays* contains complete translations of the two essays that constitute the best introductions to Leibniz's complex thought *Discourse on Metaphysics* of 1686 and *Monadology* of 1714 These are supplemented with two essays of special interest to the student of modern philosophy *On the Ultimate Origination of Things* of 1697 and the *Preface to his New Essays* of 1703 1705 The translations are taken from *Leibniz Philosophical Essays* edited and translated by Roger Ariew and Daniel Garber Hackett 1989 *Discourse on Metaphysics* Gottfried Wilhelm Freiherr von Leibniz, 1902 *Discourse on Metaphysics* Gottfried Wilhelm Leibniz, 2017-10-17 Excerpt from *Discourse on Metaphysics Correspondence With Arnauld and Monadology* Therefore I am far removed from the opinion of those who maintain that there are no principles of goodness or perfection in the nature of things or in the ideas which God has about them and who say that the works of God are good only through the formal reason that God has made them If this position were true God knowing that he is the author of things would not have to regard them afterwards and find them good as the Holy Scripture witnesses Such anthropological expressions are used only to let us know that excellence is recognized in regarding the works themselves even if we do not consider their evident dependence on their author This is confirmed by the fact that it is in reflecting upon the works that we are able to discover the one who wrought They must therefore bear in themselves his character I confess that the contrary Opinion seems to me

extremely dangerous and closely approaches that of recent innovators who hold that the beauty of the universe and the goodness which we attribute to the works of God are chimeras of human beings who think of God in human terms In saying therefore that things are not good according to any standard of goodness but simply by the will of God it seems About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Paperbound Books in Print, 1970 *Discourse on Metaphysics* Gottfried Wilhelm Freiherr von Leibniz, 1953 Discourse on Metaphysics Gottfried Wilhelm Freiherr von Leibniz, 1992 **Discourse on Metaphysics** Gottfried Wilhelm Freiherr von Leibniz, 1962 **Discourse on Metaphysics** Gottfried Wilhelm Leibniz, 2015-06-24

Excerpt from *Discourse on Metaphysics Correspondence With Arnauld and Monadology* When Descartes in the first half of the seventeenth century said that there are only two kinds of things or substances in nature namely extended substances and thinking substances or bodies and spirits that in bodies everything is reducible to extension with its modifications of form divisibility rest and motion while in the soul everything is reducible to thinking with its various modes of pleasure pain affirmation reasoning will etc when he in fact reduced all nature to a vast mechanism outside of which there is nothing but the soul which manifests to itself its existence and its independence through the consciousness of its thinking he brought about the most important revolution in modern philosophy To understand its significance however an account must be given of the philosophical standpoint of the time In all the schools at that time the dominant theory was that of the Peripatetics altered by time and misunderstood the theory of substantial forms It posited in each kind of substance a special entity which constituted the reality and the specific difference of that substance independently of the relation of its parts For example according to a Peripatetic of the time fire differs from water not only through the position of its parts but through an entity which belongs to it quite distinct from the materials When a body changes its condition there is no change in the parts but one form is supplanted by another Thus when water becomes ice the Peripatetics claimed that a new form substituted itself in place of the preceding form to constitute a new body Not only did they admit primary or basal entities or substantial forms to explain the differences in substances but for small changes also and for all the sensible qualities they had what were called accidental forms thus hardness heat light were beings quite different from the bodies in which they were found About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an
