**The Hidden History of Earth Expansion**  
 Stephen W. Hurrell, 2020-05-14 For more than half a century the theory of continental drift was widely derided Innovators developing the radical theory were labelled as unscientific by well known science authorities But then in the space of a few years virtually all opposition dramatically collapsed Continental drift transformed into plate tectonics and became widely acknowledged as one of the most profound scientific revolutions of the twentieth century Yet a number of science innovators who had been closely involved with creating this new theory of the Earth continued to research an even more radical theory They saw evidence that the new geological theory was incomplete arguing that continental drift was caused by the Earth expanding in size These science innovators give us a unique insight into their experiences They relate their personal histories of Earth expansion in 14 original essays The Hidden History of Earth Expansion presents the unique personal histories of British American Australian German Polish Romanian Indian Albanian and Jamaican science innovators as they strived to produce a modern theory of the Earth It includes chapters expressly written for the book by some of the most well known researchers into Earth expansion Hugh G Owen Cliff Ollier Karl Heinz Jacob James Maxlow Jan Koziar Stefan Cwojdzinski Carl Strutinski Stephen W Hurrell John B Eichler William C Erickson David Noel Zahid A Khan Ram Chandra Tewari Vedat Shehu and Richard Guy In addition to furnishing us with their personal histories of Earth expansion and the seemingly overwhelming evidence for its confirmation the authors highlight areas where further research is required
