Masculinities and Culture John Beynon, 2001-11-16 What is masculinity Is masculinities a more appropriate term How are masculinities socially culturally and historically shaped How are particular masculinities created enacted and represented in specific settings How can masculinities best be researched and theorized *Masculinities and Culture* explores how masculinities or ways of being a man are anchored in time and place the products of socio historical and cultural circumstances It examines the emergence of a masculinity fit for Empire in the mid to late nineteenth century and by way of contrast the more recent media driven commercial New Man and New Lad masculinity The author considers some of the media discourses shaping masculinities today and the formation of specific masculinities in specific settings such as prisons

hospitals and schools which both define and in turn are defined by strongly held conceptions of acceptable masculine behaviour He concludes by reviewing a range of ways in which masculinities might be researched from fieldwork and auto biographical and life history approaches through to semiotics and the use of both film and literary texts This lively text provides a comprehensive introduction to contemporary debates concerning masculinities as gendered constructions along with the means of researching and theorizing them

*Rebellious Families* Jan Kok,2002-12-01 Why do people rebel This is one of the most important questions historians and social scientists have been grappling with over the years It is a question to which no satisfactory answer has been found despite more than a century of research However in most cases the research has focused on what people do if they rebel but hardly ever why they rebel The essays in this volume offer an alternative perspective based on the question at what point families decided to add collective action to their repertoires of survival strategies In this way this volume opens up a promising new field of historical research the intersection of labour and family history The authors offer fascinating case studies in several countries spanning over four continents during the last two centuries In an extensive introduction the relevant literature on households and collective action is discussed and the volume is rounded off by a conclusion that provides methodological and theoretical suggestions for the further exploration of this new field in social history
