Computational Drug Discovery of Medicinal Compounds for Cancer Management Sibhghatulla Shaikh ,Khurshid Ahmad ,Mohammad Ehtisham Khan ,Faez Iqbal Khan , Cancer is still a major public health concern and it is regarded as one of the leading causes of mortality globally Despite significant advances in biotechnologies developing practical and innovative small molecule drugs remains a difficult time consuming and expensive task that necessitates collaborations from many experts in multidisciplinary fields such as computational biology drug metabolism and clinical research among others Therefore new drug development procedures that save time and cost while increasing efficiency are in high demand In silico screening in combination with molecular simulations has become an increasingly important aspect of modern drug development processes Understanding ligand protein interaction is critical in all areas of drug design and discovery Computational approaches such as molecular docking molecular dynamics simulations pharmacophore modeling and QSAR etc are efficient tools for obtaining insights on structure function relationships for small molecules and or medicinal compounds with target proteins and are widely used in the identification and optimization of leads The goal of the drug discovery process is to predict a drug candidate s metabolic fate in order to build a link between pharmacodynamics and pharmacokinetics and to identify the drug candidate s possible toxicity The advancement of in silico techniques in recent years has enabled researchers to collect more trustworthy data This Research Topic will focus on the use and application of computational methods that can aid in the drug design of medicinal compounds targeting various proteins for cancer management which is a critical requirement in the pharmaceutical sectors

Phoenix Bird Rising Robert Hall,2022-01-12 In 1976 a battle was fought and during the battle an object was found In 1986 the object began to vibrate and get warm A humming noise came from within It would be used to open a larger sphere recently found in the Inspiration copper mine Back in 1876 a town had been named after this strange object a globe with continents on it The town is Globe Arizona USA The globe of metals was sent to the Smithsonian Institute years before but it was lost over a period The town sent a professor from ASU to investigate He learned the globe was being given to a government leader in Asia as a gift for the privilege of buying oil and doing business The professor located the globe in a hidden area of the Smithsonian and removed it before it could be sent The professor is chased across the country but delivers the globe to the town council in Globe Arizona Word goes out and the professor is fired from his job but not before he gives out six hundred As to his students His wife leaves him He loses his house His car is continuously being repossessed Once he is saved by a group of bikers at a place called Hole in the Wall who stand off the collectors by shooting holes in their car Later hostages would be taken and in return the globe delivered ordered by a secret society During the battle in 1976 a motorcycle explodes and uncovers a second object with ancient figures and symbols The globe is on this artifact with wings An investigative reporter for the Street Journal tells about this object in an interview with the media The professor hears and decides to go take a look He learns that this is the long lost capstone to a pyramid which reveals the lost

and ancient truths built into the pyramids lost over thousands of years The symbols on both are the same The capstone tells of two objects a globe of pure metals and a sphere in an underground civilization The sphere vibrates when touched the globe shows where the sphere is located Is this the globe for which the town was named The professor investigates further What of this underground sphere Who could know that it would be found in 1986 What would the globe reveal What is the point Read the story
