Crunelle,2018 ADHD is a highly comorbid disorder in patients with substance use disorders SUD This comorbid patient population is however often undertreated Diagnosing ADHD in patients with SUD is not easy due to the large overlap of the ADHD characteristics with symptoms of intoxication and withdrawal These patients often disappear prematurely from the treatment services on the one hand

because their untreated ADHD symptoms make it more difficult to follow the therapy on the other hand because the treatment programs do not take their limitations into account Caregivers expressed a great need for concrete tools to work with these patients Therefore Managing ADHD in the presence of substance use disorders consists of a theoretical and a practical part The different aspects of the treatment are described from various therapeutic perspectives and elaborated in ten modules with downloadable worksheets This is a practical and insightful book that I highly recommend to both novice and experienced clinicians alike Frances R Levin MD PhD Columbia University Medical Center New York State Psychiatric Institute For the first time clinical and scientific knowledge is summarized and integrated in a handsome format In addition this book can be used by clinicians and patients in the context of psychoeducation and as a shared decision making aid Wim van den Brink MD PhD Professor of Psychiatry and Addiction Academic Medical Centre University of Amsterdam **100**
