Coping With Marital Transitions A Family Systems Perspective:

Coping with Marital Transitions, 1992 **Coping with Marital Transitions**, 1992 *Coping with Marital Transitions* Eileen Mavis Hetherington, 1992 **Divorce, Family Structure, and the Academic Success of Children** William Jeynes, 2012-12-06 Trace the influence of family factors on children's emotional and educational well-being. The effect of family changes on children's academic success is a new subject for study. *Divorce, Family Structure, and the Academic Success of Children* is a comprehensive volume that brings research on this hotly debated topic up to date. With clear tables and incisive arguments, it is a single volume reference on this vexing sociocultural problem. *Divorce, Family Structure, and the Academic Success of Children* offers a close look at the historical background and current theory of this field of study. But it is more than a compendium of known facts and completed studies. It examines issues of appropriate methodology and points out concerns for planning future research. *Divorce, Family Structure, and the Academic Success of Children* summarizes current knowledge of the effects of various influences on children's emotional and educational well-being, including divorce and remarriage, single parent families, nontraditional family structures, race, socioeconomic status, mobility. Educators, theorists, sociologists, and psychologists will find this volume an essential resource. With hundreds of useful references and clear organization, it presents new ideas in an easy-to-use format that makes it an ideal textbook as well. **Normal Family Processes, Fourth Edition** Froma Walsh, 2015-10-02 Widely adopted, this valued course text and practitioner guide has expanded the understanding of family normality and healthy functioning in our increasingly diverse society. The editor and contributors are at the forefront of research and clinical training. They describe the challenges facing contemporary families and ways in which clinicians can promote resilience. With consideration of sociocultural and developmental influences, chapters identify key family processes that nurture and sustain strong bonds in couples, dual earner, divorced, single parent, remarried, adoptive, and kinship care families; gay and lesbian families; culturally diverse families; and those coping with adversity such as trauma, poverty, and chronic illness. New to This Edition: Reflects important research advances and the changing contexts of family life. Additional chapter topics: kinship care, family rituals, evidence-based assessment, and neurobiology. All chapters have been fully updated. *Family* Betty Farrell, 2018-02-02 The research conducted by family historians over the past three decades challenges, modifies, and ultimately enriches sociological understandings about American family life today. By looking closely at the historical record, the author is able to debunk certain myths, such as the belief that the ideal family (male breadwinner and female domestic manager) has been historically prevalent; that the traditional family has been disintegrating in recent years; that the presumed breakdown of the family has left children more vulnerable than in the past. **Handbook of Parenting: Being and becoming a parent** Marc H. Bornstein, 2002 Despite the fact that most people become parents and everyone who has ever lived has had parents, parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree. Striking permutations on the theme of

parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny Handbook of Parenting Marc H. Bornstein, 2005-02-16 Please see Volume I for a full description and table of contents for all four volumes **How Children Develop** Robert S. Siegler, Judy S. DeLoache, Nancy Eisenberg, 2006 In its first edition this highly anticipated textbook for the topically organized child development course provided a fresh non encyclopedic approach offering the latest straight from the research understanding of child development without overwhelming the student with inessential detail The new edition brings those hallmark features forward again providing a thoroughly contemporary streamlined introduction to the study of child development that emphasizes fundamental principles enduring themes and important recent studies Student friendly pedagogy a new chapter on gender and an enhanced media and supplements package further enrich this accessible engaging and informative text Concepts of Family Life in Modern Catholic Theology Donald A. Miller, 1996-11 Professor Donald A Miller s innovative study is a psychological theological and ethical discussion of family via Church doctrine tradition and law Miller seeks definitions to model various forms of familial situations in the U S and abroad This study will furnish a new understanding of family and the problems that exist in the modern family and the modern Church Concepts of Family Life in Modern Catholic Theology will be useful not only to theological studies but to those concerned with the role of the family in the Church A clear fair assessment of Church doctrine and conceptual evolution Professor Andrew Woznicki S T D **Annual Review of Psychology** Calvin Perry Stone, 1997 Publishes original critical reviews of the significant literature and current developments in psychology
