Copyright and Multimedia Products Irini A. Stamatoudi, 2001-11-08 Multimedia products have experienced tremendous market success Yet too often they are given inadequate protection under existing national and international copyright schemes Irini Stamatoudi provides a comprehensive comparative treatment of multimedia works and copyright protection in this clear and concise volume A detailed introduction outlines the nature of the multimedia work as well as the scope of existing legislation separate chapters consider collections and compilations databases audiovisual works and computer programs video games are here treated as a test case Stamatoudi then analyses issues of qualification regime of protection and offers a model for a European legislative solution Copyright and Multimedia Products will interest academics and students as well as practitioners and copyright policy makers

Copyright Law in the Digital Society Tanya Aplin, 2005-08-30 Multimedia technology is a key component of the Digital Society This book comprehensively examines the extent to which copyright and database right protect multimedia works It does so from the perspective of UK law but with due attention being paid to EU law international treaties and comparative developments in other jurisdictions such as Australia and the U S The central argument of the book is that the copyright and database right regimes are for the most part flexible enough to meet the challenges presented by multimedia As a result it is neither necessary nor desirable to introduce separate copyright protection or sui generis protection for multimedia works This important and original new work will be essential reading for any lawyer engaged in advising on IP matters relating to the new media industries and scholars and students working in intellectual property and computer law

Copyright and Multimedia Julian Rodriguez Pardo, 2003-01-01 Technology has affected a wide range of issues in our personal and professional lives And in doing so it has opened the door for new legal questions especially with regard to intellectual property and more specifically copyright New legal questions have arisen with respect to the authorship of web pages databases computer programs and in general multimedia work Is this technology internationally protected Can internet piracy be considered piracy To whom does the copyright belong when more than one author exists When is it necessary to resort to technical protection devices By examining international laws such as the WIPO treaties and EU law this book offers a clear answer to these questions while focusing on how copyright does or does not protect new technology It also examines alternative ways of protecting technologies that present the real possibility of appealing to patent and trademark law as well as an overview of the multimedia concept and the origins of copyright This book's simple structure helps the reader to understand how to utilize current laws to protect one's work and offers an interesting and informative analysis of the subject
