Corbusier The Poetics Of Machine And Metaphor:

Le Corbusier Alexander Tzonis, 2001 No other architect since Palladio has exercised such an immense influence as Le Corbusier As with Einstein and Picasso Le Corbusier made an impact that was felt within but also outside his special discipline Through numerous buildings urban projects paintings sculptures drawings and publications he succeeded to develop a unique poetics of machine and metaphor revolutionizing the way people see use and make architecture More than a modern architect Le Corbusier was the architect of modern life The present monograph discusses Le Corbusier's oeuvre in a concise global manner in relation to the revolutionary developments of the century in which it was born It shows how Le Corbusier worked within the context of new philosophical ideas the avant garde culture the social economic and political movements and new technology achieving more than a delicate balance a synthesis But it demonstrates also that Le Corbusier was a creator who conceived enticed and shaped many of these developments As well as being the architect of the twentieth century Le Corbusier is a prototype of human creativity [Le Corbusier's Venice Hospital Project](#) Mahnaz Shah, 2017-05-15 While Le Corbusier's urban projects are generally considered confrontational in their relationship to the traditional urban fabric his proposal for the Venice hospital project remained an exercise in preserving the medieval fabric of the city of Venice through a systemic replication of its urban tissue This book offers a detailed study of Le Corbusier's Venice hospital project as a plausible built entity In addition it analyses it in the light of its supposed affinity with the medieval urban configuration of the city of Venice No formal attempt to date has been made to critically analyse the hospital project's design considerations in comparison to the medieval urban configuration of the city of Venice Using a range of methodologies including those from architectural theory and history using archival resources on site analysis and interviews with important resource persons this book is an interpretation of the conceptual basis for Le Corbusier's understanding of the structural formulation of the city of Venice as mentioned in *The Radiant City* 1935 In doing so it deciphers the diagrammatic analysis of the city structure found in this work into a set of coherent design modules that were applied in the hospital project and that could become a point of further investigation Architects and other architecturally interested laypeople with an interest in Venice will find the book a valuable addition to their knowledge For architectural historians the book makes an important link between modernism and the historically grown Venice **Echo's Chambers** Joseph L. Clarke, 2021-06-08 A room's acoustic character seems at once the most technical and the most mystical of concerns Since the early Enlightenment European architects have systematically endeavored to represent and control the propagation of sound in large interior spaces Their work has been informed by the science of sound but has also been entangled with debates on style visualization techniques performance practices and the expansion of the listening public *Echo's Chambers* explores how architectural experimentation from the seventeenth through the mid twentieth centuries laid the groundwork for concepts of acoustic space that are widely embraced in contemporary culture It focuses on the role of echo and reverberation in the architecture

of Pierre Patte Claude Nicolas Ledoux Carl Ferdinand Langhans and Le Corbusier as well as the influential acoustic ideas of Athanasius Kircher Richard Wagner and Marshall McLuhan Drawing on interdisciplinary theories of media and auditory culture Joseph L Clarke reveals how architecture has impacted the ways we continue to listen to talk about and creatively manipulate sound in the physical environment **The Architects' Journal** ,2002 **Relearning from Las Vegas** Aron Vinegar,Michael J. Golec,2009 Evaluates for the first time one of the foundational works in architecture criticism Immediately on its publication in 1972 Learning from Las Vegas by Robert Venturi Denise Scott Brown and Steven Izenour was hailed as a transformative work in the history and theory of architecture liberating those in architecture who were trying to find a way out of the straitjacket of architectural orthodoxies Resonating far beyond the professional and institutional boundaries of the field the book contributed to a thorough rethinking of modernism and was subsequently taken up as an early manifestation and progenitor of postmodernism **Le Corbusier's Secret Laboratory** Le Corbusier,Moderna museet (Stockholm, Sweden),2013 Charles douard Jeanneret known as Le Corbusier 1887 1965 influenced the design function and construction of office and residential buildings as well as twentieth century art and design However there has not yet been an extensive precise examination of his role as an artist For more than five decades Le Corbusier oscillated between contradictory poles his dedication to mechanical objects on the one hand and his search for poetic form on the other The mutual inspiration stemming from aesthetic versus creative took place in his secret laboratory the artist s studio This is the first publication to consolidate all of the facets of his oeuvre and it arrives at new approaches toward understanding his paintings drawings sculptures tapestries furniture architectural sketches and plans as well as his books and photographs The book s five chapters cover a wide spectrum ranging from the purist paintings and early villas to Le Corbusier s reinterpretation of values and his late works Exhibition schedule Moderna Museet Stockholm January 19 April 18 2013 [Le Corbusier and Britain](#) Irena Žantovská Murray,Julian Osley,2009 First Published in 2009 Routledge is an imprint of Taylor Francis an informa company **Use and Adaptation of Precedents in Architectural Design** Karina Moraes Zarzar,2003 This is a Ph D thesis For centuries architects have used design precedents in the conception of new design solutions Whether explicitly as in the case of Le Corbusier James Stirling and Jo Coenen or implicitly as with J J P Oud Aldo van Eyk **Architecture Today** ,2002 *Design Knowledge Systems Research Center, 1985-2005* Technische Universiteit Delft.
