

A level Edexcel physics core practicals.

Core practical 1 determining g methodology - ANSDrop object from rest. Measure time taken for sphere to fall to trap door OR measure time taken for card to fall through light gate.

Core practical 1 safety - ANSClamp stands etc. and make sure that all apparatus cannot topple over.
Be aware of falling objects.

Core practical 1 methods to reduce error. - ANSMake sure card is falling straight - reduces air resistance and same length has to fall through light gate each time - introduces uncertainty in the length.

Use large values of h to reduce effects of uncertainty of t.

Core practical 1 measurements and analysis - ANSTime taken for object to fall x distance - repeat 3 times at each height and then at 5 different heights.

Plot a graph of t^2 against h and work out gradient.

$g = 2/m$

OR

Time taken for object to fall through light gate - work out final velocity v.

Plot a graph of v^2 against h and calculate gradient.

$g = m/2$

Core practical 1 uncertainty - ANSUse half of range of t readings, calculate percentage uncertainty for t.

Core practical 2 determining resistivity of a metal methodology - ANSMeasure diameter of wire - 3 positions around wire and at 3 orientations at each point - mean.

Circuit of a power supply, variable resistor, ammeter and length of wire all in series and then a voltmeter over the eighth of wire.

Connect crocodile clip at 0, then at 10cm intervals from the end of the wire.

Record resistance at each length.

Voltmeter and ammeter = greater resolution than multimeter.

Core practical 2 - safety - ANSLow voltages and currents used - no hazard.
Normal laboratory safety to do with electricity.

Core practical 2 reducing errors. - ANSCrocodile clip not at 0 - systematic error.

Crocodile clip not properly attached = higher resistance measured - check before carrying experiment out.

Ohm-meter can replace power supply, voltmeter and ammeter.

Core Physics Bryan Milner, 1999-06-17 An accessible course comprising pupil books and accompanying photocopiable supplementary material and a separate workbook The pupil book *Core Physics* is for Key Stage 3 Separate Science The carefully controlled language level and extensive use of images make these resources accessible to most pupils Each double page spread provides balance of illustrations text and questions to support the introduction of new concepts

Core Physics Milner, *Core Physics* forms part of a three volume resource supporting separate science teaching for 11 to 14 year olds It provides all the physics needed for pupils to do well in key stage 3 SATs or the Common Entrance Examination The material is arranged into three topic types Basic Concepts Consolidation and Development The Basic Concepts chapters provide an accessible route to understanding the key physical concepts each chapter begins gently and then progressively becomes more demanding The Consolidation sections revisit the key concepts in new contexts and offer further learning and revision opportunities for all abilities The Development topics provide further motivation and challenging material for those pupils moving on to study the separate sciences post 14
