Corn And Capitalism How A Botanical Bastard Grew To Global Dominance:

Corn & Capitalism Arturo Warman, 2003 Exploring the history and importance of corn worldwide Arturo Warman traces its development from a New World food of poor and despised peoples into a commodity that plays a major role in the modern global economy The book first published in Mexico i *The Oxford Handbook of Agricultural History* Jeannie M.

Wayne, 2024 Agricultural history has enjoyed a rebirth in recent years in part because the agricultural enterprise promotes economic and cultural connections in an era that has become ever more globally focused but also because of agriculture's potential to lead to conflicts over precious resources The Oxford Handbook of Agricultural History reflects this rebirth and examines the wide reaching implications of agricultural issues featuring essays that touch on the green revolution the development of the Atlantic slave plantation the agricultural impact of the American Civil War the rise of scientific and corporate agriculture and modern exploitation of agricultural labor **The Routledge History of American Foodways**

Michael D. Wise, Jennifer Jensen Wallach, 2016-02-12 The Routledge History of American Foodways provides an important overview of the main themes surrounding the history of food in the Americas from the pre colonial era to the present day By broadly incorporating the latest food studies research the book explores the major advances that have taken place in the past few decades in this crucial field The volume is composed of four parts The first part explores the significant developments in US food history in one of five time periods to situate the topical and thematic chapters to follow The second part examines the key ingredients in the American diet throughout time allowing authors to analyze many of these foods as items that originated in or dramatically impacted the Americas as a whole and not just the United States The third part focuses on how these ingredients have been transformed into foods identified with the American diet and on how Americans have produced and presented these foods over the last four centuries The final section explores how food practices are a means of embodying ideas about identity showing how food choices preferences and stereotypes have been used to create and maintain ideas of difference Including essays on all the key topics and issues The Routledge History of American Foodways comprises work from a leading group of scholars and presents a comprehensive survey of the current state of the field It will be essential reading for all those interested in the history of food in American culture **Planet Taco** Jeffrey M.

Pilcher, 2017-02-14 Planet Taco examines the historical struggles between globalization and national sovereignty in the creation of authentic Mexican food By telling the stories of the Chili Queens of San Antonio and the inventors of the taco shell it shows how Mexican Americans helped to make Mexican food global [The Corpse in the Kitchen](#) Adam John

Waterman, 2021-12-21 Reassessing the archive of the Black Hawk War The Corpse in the Kitchen explores relationships between the enclosure of Indigenous land histories of resource extraction and the literary culture of settler colonialism While conventional histories of the Black Hawk War have long treated the conflict as gratuitous Adam John Waterman argues that the war part of a struggle over the dispensation of mineral resources specifically mineral lead and the emergence of new

cultures of killing and composition The elemental basis for the fabrication of bullets lead drawn from the mines of the upper Mississippi contributed to the dispossession of Indigenous peoples through the consolidation of U S control over a vital military resource Rendered as metallic type Mississippian lead contributed to the expansion of print culture providing the occasion for literary justifications of settler violence and promulgating the fiction of Indigenous disappearance Treating the theft and excarnation of Black Hawk s corpse as coextensive with processes of mineral extraction Waterman explores ecologies of racial capitalism as forms of inscription documentary traces written into the land Reading the terrestrial in relation to more conventional literary forms he explores the settler fetishization of Black Hawk s body drawing out homoerotic longings that suffuse representations of the man and his comrades Moving from print to agriculture as modes of inscription Waterman looks to the role of commodity agriculture in composing a history of settler rapine including literal and metaphoric legacies of anthropophagy Traversing mouth and stomach he concludes by contrasting forms of settler medicine with Black Hawk s account of medicine as an embodied practice understood in relation to accounts of dreaming and mourning processes that are unforgivably slow and that allow time for the imagination of other futures other ways of being
