Corporatism And Development:

A Third Path Melissa Teixeira, 2024-03-19 A transnational history of corporatism a third path between capitalism and communism centered on mid twentieth century Brazil Following the First World War there was a widespread feeling that the unchecked free market competition had given rise to financial crisis social unrest and chronic underdevelopment With people and governments across the world looking for an alternative to laissez faire capitalism Brazil took a central role in experimenting with a third path between capitalism and communism corporatism *Remaking Capitalism A Global History of Corporatism in Brazil* 1920s 1960s argues that corporatism transformed the Brazilian state into an agent of economic development and it explains why it matters that this transformation was engineered under an authoritarian regime Melissa Teixeira incorporates wide ranging legal economic and cultural sources to document the process of state building from the perspective of government ministries and grocery markets alike from 1917 to the 1950s During the Getulio Vargas regime 1930 45 especially the state took an unprecedented role in controlling social pressures and economic growth via wage and price agencies labor tribunals and technical councils Teixeira looks beyond categorical authoritarianism to explain how corporatism constituted an early experiment with the mixed economy as a path to development combining state planning with a market economy Corporatism she shows generated a model of development dependent on uneven and unequal citizenship in which economic interests and not individuals organized and petitioned through the state With Brazil at the center of this story of economic experimentation *Remaking Capitalism* centers the Global South in the longer history of the production of economic thought Drawing comparisons with the United States Italy and Portugal Teixeira offers a transnational history of this important interwar attempt to create a third way between capitalism and communism

Politics in the Portuguese Empire M. Anne Pitcher,1993 Did the

expansion of colonial empires in Africa drain the resources of the metropole or did they produce new pockets of wealth Whether colonialism brought costs or benefits to metropolitan governments and industry occupied the minds of European policy makers and manufacturers in the nineteenth century and has fuelled debates among scholars of colonialism during most of the twentieth Portugal's empire in Africa was no exception Although it furnished protected markets and guaranteed supplies for trade and industry the empire also exacted its price For the Portuguese as for many other colonial powers no undertaking exposed the benefits and burdens as starkly as the creation of the cotton regime Anne Pitcher looks in detail at metropolitan and colonial policy under the Salazar and Caetano governments and critically assesses the influence of empire on the development of the textile industry in metropolitan Portugal She challenges myths about the corporate nature of the Portuguese regime after 1926 exposes the pitfalls of authoritarian economic solutions and concludes that links with empire were not necessarily beneficial instead conflicting interests and contradictory policies had unintentional even debilitating effects on many participants in the system from African cotton producers to metropolitan textile manufacturers This book examines the complex relationship which existed for nearly half a century between the Portuguese authoritarian regime the domestic textile industry and the empire in Africa and finds that contrary to the common assumption state policies did not always favour Portugal's major industry It will be of interest not only to scholars working on the political economy of Portugal and Portuguese speaking Africa but also to comparativists studying the costs and benefits of empire or investigating different models of development
