Corpus Annotation, 1997 **Variation and Change in Spoken and Written Discourse** Julia Bamford, Silvia Cavalieri, Giuliana Diani, 2013-10-31 This book focuses on aspects of variation and change in language use in spoken and written discourse on the basis of corpus analyses providing new descriptive insights and new methods of utilising small specialized corpora for the description of language variation and change The sixteen contributions included in this volume represent a variety of diverse views and approaches but all share the common goal of throwing light on a crucial dimension of discourse the dialogic interactivity between the spoken and written Their foci range from papers addressing general issues related to corpus analysis of spoken dialogue to papers focusing on specific cases employing a variety of analytical tools including qualitative and quantitative analysis of small and large corpora The present volume constitutes a highly valuable tool for applied linguists and discourse analysts as well as for students instructors and language teachers *Semantics. Volume 3* Claudia Maienborn, Klaus von Heusinger, Paul Portner, 2012-12-19 No detailed description available for SEMANTICS MAIENBORN ET AL BD 33 3 HSK E BOOK Comparing and Aligning Process Representations Han van der Aa, 2018-06-26 This doctoral thesis focuses on the spread of process information in organizations and in particular on the mitigation of the problems caused by the spread of information on a single process over numerous models documents and systems Processes within organizations can be highly complex chains of inter related steps involving numerous stakeholders and information systems Due to this complexity having access to the right information is vital to the proper execution and effective management of an organization s business processes The main contributions of this thesis are five techniques that focus on the alignment and comparison of process information from different informational artifacts Each of these techniques tackles a specific scenario involving multiple informational artifacts that contain process information in different representation formats Current and New Directions in Discourse and Dialogue Jan C.J. van Kuppevelt, R.W. Smith, 2012-12-06 The origins of this book arise from the highly successful second SIGdial Workshop on Discourse and Dialogue that was held in September 2001 in conjunction with Eurospeech 2001 The original workshop proceedings consisted of 29 papers selected from 57 submissions an exceptionally high number of submissions for a two day workshop This book includes extended versions of 12 papers originally presented at the workshop In addition 4 other invited papers on major themes in discourse and dialogue research are included There are three main themes addressed by the papers in this collection 1 corpus annotation and analysis 2 method ologies for construction of dialogue systems and 3 perspectives on various key theoretical issues including communicative intention context based gen eration and modeling of discourse structure However because of the very nature of discourse and dialogue research that often requires researchers to tackle several issues in one piece of work we have chosen to order the papers alphabetically by author rather than try to create artificial thematic sections We believe this collection provides a concise yet reasonably comprehensive snapshot of major

research themes in discourse and dialogue We hope that readers will benefit greatly from this collection **Literary Digital Stylistics in Translation Studies** Anna Maria Cipriani, 2023-11-20 This book presents a systematic literary comparison of the retranslations by adopting a mixed method and bottom up inductive approach by developing an empirical corpus approach This corpus is specifically tailored to identify and study linguistic and non linguistic modernist features throughout the texts such as stream of consciousness indirect interior monologue and free indirect speech All occurrences are analysed quantitatively in the computations of inferential and comparative statistics such as tests of time trends lexical variety and lexical frequency The target texts are digitised and the resulting text files are then analysed using a bespoke novel computer program capable of the functions not provided by commercially available software such as WordSmith Tools and WMatrix This methodology enables in depth explorations of micro and macro textual features and allows a mixed method approach combining close reading qualitative analysis with systematic quantitative comparisons The empirical study of the digital corpus of eleven Italian re translations of Virginia Woolf's *To the Lighthouse* identifies a progressive source text orientation only in a relatively few aspects of a few target texts The translators presence affects all the examined target texts in terms of register and style under the influence of the Italian translation norms usually attributed to the translation of literary classics Its intended readership comprises students of the mentioned fields and the general public of readers editors and publishers

Data Analytics in Digital Humanities Shalin Hai-Jew, 2017-05-03 This book covers computationally innovative methods and technologies including data collection and elicitation data processing data analysis data visualizations and data presentation It explores how digital humanists have harnessed the hypersociality and social technologies benefited from the open source sharing not only of data but of code and made technological capabilities a critical part of humanities work Chapters are written by researchers from around the world bringing perspectives from diverse fields and subject areas The respective authors describe their work their research and their learning Topics include semantic web for cultural heritage valorization machine learning for parody detection by classification psychological text analysis crowdsourcing imagery coding in natural disasters and creating inheritable digital codebooks Designed for researchers and academics this book is suitable for those interested in methodologies and analytics that can be applied in literature history philosophy linguistics and related disciplines Professionals such as librarians archivists and historians will also find the content informative and instructive Readings in Quantitative Linguistics Panchanan Mohanty, 2008 Contributed articles presented at the

International Symposium on Linguistics Quantification and Computation from March 9 to 11 2005 at Centre for Applied Linguistics and Translation Studies University of Hyderabad **Discourse In and Through the Media** Marina Bondi, Silvia Cacchiani, 2016-01-14 This book is a result of the 2013 CLAVIER Conference held in Modena in November 2013 and includes a selection of the papers presented on that occasion As the title suggests this volume encourages cross generic and cross disciplinary investigations in order to advocate integrated approaches to the study of media discourse regarding both

theoretical background and practical applications Bringing together a wide range of case studies the book fosters debate on a variety of aspects related to the representation of specialised discourse in and through the media including for example voice and point of view argumentative practices knowledge construction multimodality the re contextualization and re conceptualization of knowledge opinion formation and peer to peer communication and popularization in and through traditional digital and social media Taken together the contributions to this volume provide extensive exemplification of the type of research currently being conducted on these issues The variety of the questions posed and the wide array of methods used here therefore represent a substantial contribution to sharpening existing knowledge and furthering the ongoing debate among scholars in the field

Language, Gender and Videogames Frazer Heritage, 2021-07-30 This book explores how corpus linguistic techniques can be applied to close analysis of videogames as a text particularly examining how language is used to construct representations of gender in fantasy videogames The author demonstrates a wide array of techniques which can be used to both build corpora of videogames and to analyse them revealing broad patterns of representation within the genre while also zooming in to focus on diachronic changes in the representation of gender within a best selling videogame series and a Massively Multiplayer Online Role Playing Game MMORPG The book examines gender as a social variable making use of corpus linguistic methods to demonstrate how the language used to depict gender is complex but often repeated This book combines fields including language and gender studies new media studies ludolinguistics and corpus linguistics and it will be of interest to scholars in these and related disciplines

Corpus Linguistics Anke Lüdeling, Merja Kytö, 2008 This handbook provides an up to date survey of corpus linguistics Spoken written and multimodal corpora serve as the bases for quantitative and qualitative research on many issues of linguistic interest The two volumes together comprise 61 articles by renowned experts from around the world They sketch the history of corpus linguistics and its relationship with neighbouring disciplines show its potential discuss its problems and describe various methods of collecting annotating and searching corpora as well as processing corpus data
