Corpus Christianorum Continuatio Mediaev:

The Theologies of the Eucharist in the Early Scholastic Period Gary Macy, 1984 Mediaeval and Renaissance Logic Dov M. Gabbay, John Woods, 2008-03-14 Starting at the very beginning with Aristotle's founding contributions logic has been graced by several periods in which the subject has flourished attaining standards of rigour and conceptual sophistication underpinning a large and deserved reputation as a leading expression of human intellectual effort It is widely recognized that the period from the mid 19th century until the three quarter mark of the century just past marked one of these golden ages a period of explosive creativity and transforming insights It has been said that ignorance of our history is a kind of amnesia concerning which it is wise to note that amnesia is an illness It would be a matter for regret if we lost contact with another of logic's golden ages one that greatly exceeds in reach that enjoyed by mathematical symbolic logic This is the period between the 11th and 16th centuries loosely conceived of as the Middle Ages The logic of this period does not have the expressive virtues afforded by the symbolic resources of uninterpreted calculi but mediaeval logic rivals in range originality and intellectual robustness a good deal of the modern record The range of logic in this period is striking extending from investigation of quantifiers and logic consequence to inquiries into logical truth from theories of reference to accounts of identity from work on the modalities to the stirrings of the logic of relations from theories of meaning to analyses of the paradoxes and more While the scope of mediaeval logic is impressive of greater importance is that nearly all of it can be read by the modern logician with at least some prospect of profit The last thing that mediaeval logic is is a museum piece Mediaeval and Renaissance Logic is an indispensable research tool for anyone interested in the development of logic including researchers graduate and senior undergraduate students in logic history of logic mathematics history of mathematics computer science and AI linguistics cognitive science argumentation theory philosophy and the history of ideas Provides detailed and comprehensive chapters covering the entire range of modal logic Contains the latest scholarly discoveries and interpretative insights that answer many questions in the field of logic **Mediaeval Antiquity** Andries Welkenhuysen, Herman Braet, Werner Verbeke, 1995 Papers read to the colloquium which was organized from 28 to 30 May 1990 at the Katholieke Universiteit Leuven Studies and Texts - Pontifical Institute of Mediaeval Studies, 1987

Rewards and Punishments in the Arthurian Romances and Lyric Poetry of Mediaeval France Peter V. Davies, Angus J. Kennedy, 1987 The essays in this volume a Festschrift for Professor Kenneth Varty are centred on the relatively unexplored theme of rewards and punishments in French Arthurian romance and the medieval lyric The Arthurian studies range over verse Brouilhet Jean Renart the Roman de Silence and prose Robert de Boron the Queste del Saint Graal Perlesvaus Lancelot and the Tristan reflecting a variety of different approaches from an examination of the legal background to the work of Brouilhet to an iconographical survey of hitherto undiscussed and unpublished Tristan illustrations to close textual analysis of an episode in Robert de Boron's Joseph and Merlin Dictionary Catalogue of the Library of the Pontifical Institute of
