Alberto Ginastera Deborah Schwartz-Kates, 2011-05-03 *Alberto Ginastera A Research and Information Guide* is the first bio bibliographic study of the composer and the only published book on the subject in English This work fills a critical gap in contemporary music studies by enriching our knowledge of one of the most compelling creative voices of the Americas Given the lack of prior systematic attention to Ginastera this book establishes a firm foundation for future scholarship It includes a detailed biographical sketch of the composer that quotes extensively from his letters It summarizes the defining features of his style and encompasses his infrequently explored late works It offers the most comprehensive catalogue of Ginastera s music to date and provides an annotated list of his published writings This book contains over 400 annotated bibliographic entries that refer to critically selected sources in English Spanish French German and Italian The last chapter offers new information about archival holdings and internet resources that facilitates research on this composer An appendix featuring a detailed chronology of Ginastera s career completes this work

Musical Topics and Musical Performance Julian Hellaby, 2023-01-31 The principal purpose of topics in musicology has been to identify meaning bearing units within a musical composition that would have been understood by contemporary audiences and therefore also by later receivers albeit in a different context and with a need for historically aware listening Since Leonard Ratner 1980 introduced the idea of topics his relatively simple ideas have been expanded and developed by a number of distinguished authors Topic theory has now become a well established branch of musicology often embracing semiotics but its relationship to performance has received less attention *Musical Topics and Musical Performance* thus focuses on the interface of theory and practice and investigates how an appreciation of topical presence in a work may prompt interpretative thoughts for a potential performer as well as how performers have responded to such a presence in practice The chapters focus on music from the nineteenth twentieth and twenty first centuries with case studies drawn from composers as diverse as Beethoven Scriabin and P ter E tv s Using both scores and recordings the book presents a variety of original and innovative perspectives on the subject from a range of distinguished authors and addresses a neglected area of musicology and musical performance
