Dark Design:

The Magic Labyrinth of Philip José Farmer Edgar L. Chapman, 1984-01-01 Dr Chapman provides the first comprehensive examination of Farmer's major themes and fiction from his earliest writings to his bestseller *The Gods of Riverworld*

Design(s) for Law Rossana Ducato, Enguerrand Marique, Alain Strowel, 2024-06-25 Legal design has been with us for over a decade. Its core idea, i.e. to use design methods to make the world of law accessible to all, has been widely embraced by academics, researchers, and professionals. Over time, the field has grown, expanding its initial problem-solving approach to other dimensions of design, such as speculative design, design fiction, proactive law, and disciplines like cognitive science and philosophy. The book presents a state-of-the-art reflection on legal design evolution and applications. It features twelve insightful contributions discussed during the 2023 Legal Design Roundtable on Design(s) for Law, organised within the Erasmus Jean Monnet clinic on EU Digital Rights Law and Design. These perspectives from academics and professionals add important nuances to the literature, either presenting new approaches, applying consolidated practices to new contexts and areas, or showcasing actual and potential applications. Ideal for academics, legal professionals, and students, this book is a must-read for anyone interested in new critical approaches to the law and in the creative construction of fairer and more human-friendly legal systems

Hybrid Mobilities Nadine Cattani, Laurent Faret, 2021-07-30

Diverse factors like globalization geopolitical tensions and the transformation of lifestyles are strengthening the role of mobility as a structuring dimension of contemporary societies Social science research has taken note of these changes but few studies cross the different forms of mobility ranging from commuting to tourists and backpackers and on to seasonal workers or international migrants The diversity of mobility situations studied in this book highlights the contribution of the reality of mobility in the daily construction of urban regional and global spaces as well as in the redefinition of socio spatial concepts By using an interdisciplinary relational approach the book revisits certain concepts such as exclusion heritage or distance in order to understand spatialities beyond the oppositions of fixity mobility private public or here elsewhere The book sheds light on the capacities for resistance of mobile persons in Singapore Dakar Bangkok Amman Paris New York or Mexico by studying the power relationships that are established in situations of mobility By deciphering the values that characterize regimes of im mobility the contributors stress the normative injunctions of public policies and social practices The originality of the work lies in capturing the deployment of alternative spatialities and underlining how they are reshaped between sedentary and mobility regimes It highlights the importance of fully associating mobility with its characteristics of ephemerality and fluidity in our theorizations and understandings of spatialities By taking a post structuralist posture the book makes it possible to establish a logic of and to design a between of things and to reverse ontology This allows the temporary and the connected to be rehabilitated beyond distance in our practical knowledge of spatialities and territorialities As such the volume will be of interest to scholars of geography sociology anthropology and urban studies with interests in mobility migration and relational thought
