

# EMOTION-FOCUSED COPING

Emotion-focused coping refers to strategies to manage stress that involve emotional regulation. It is juxtaposed to the problem-focused approach.

## DEFINITION

Lazarus and Folkman (1984) make a distinction between problem-focused and emotion-focused coping:

"a distinction that we believe is of overriding importance, namely, between coping that is directed at managing or altering the problem causing the distress and coping that is directed at regulating emotional response to the problem" (p. 150).

## EXAMPLES

**Journaling:** Writing about stressful events is a way of releasing negative energy. Describing what happened can increase perceptions of control and help regulate emotions.

**Selective Attention:** After a difficult day at work, focusing on the positive things that happened can reduce the anxiety of the negative events that occurred that day.

## **Coping The Psychology Of What Works:**

**Coping** C. R. Snyder, 1999 Most people take the process of coping for granted as they go about their daily activities In many ways coping is like breathing an automatic process requiring no apparent effort However when people face truly threatening events what psychologists call stressors they become acutely aware of the coping process and respond by consciously applying their day to day coping skills Coping is a fundamental psychological process and people s skills are commensurately sophisticated This volume builds on people s strengths and emphasizes their role as positive copers It features techniques for preventing psychological problems and breaks from the traditional research approach which is modeled on medicine and focuses on pathology and treatment Collecting both award winning research and new findings this book may well set the agenda for research on stress and coping for the next century These provocative and readable essays explore a variety of topics including reality negotiation confessing through writing emotional intelligence optimism hope mastery oriented thinking and more Unlike typical self help books available at any newsstand this volume features the work of some of the most eminent researchers in the field Yet like those books it is written for the general reader as well as for the specialist and includes numerous practical suggestions and techniques It will prove an invaluable tool for a wide range of readers

Coping with Stress C. R. Snyder, 2001 This is a companion volume to Coping The Psychology of What Works It includes contributions by well known clinical and health psychologists and covers some of the most provocative topics under study in the area of coping

**The Handbook of Stress and Health** Cary Cooper, James Campbell Quick, 2017-02-07 A comprehensive work that brings together and explores state of the art research on the link between stress and health outcomes Offers the most authoritative resource available discussing a range of stress theories as well as theories on preventative stress management and how to enhance well being Timely given that stress is linked to seven of the ten leading causes of death in developed nations yet paradoxically successful adaptation to stress can enable individuals to flourish Contributors are an international panel of authoritative researchers and practitioners in the various specialty subjects addressed within the work

*Evidence-Based Coaching Volume 1* Michael Cavanagh, Anthony M. Grant, Travis Kemp, 2005 Presents key papers from the first Evidence Based Coaching Conference held at the University of Sydney July 2003 Addresses the concerns of the emerging profession of coaching giving an overview of the field developing coaching theory and its evidence based practice and reporting on empirical and qualitative studies

**Causes, Coping and Consequences of Stress at Work** Cary L. Cooper, Roy L. Payne, 1988-09-13 A collection of essays by a team of international researchers in the field of occupational stress Each author focuses on research findings theories methodological issues and action for coping with stress at work relevant to both individuals and to organizations

Coping with Negative Life Events C.R. Snyder, Carol E. Ford, 2013-06-29 Like a Bridge over Troubled Waters The surge of current interest in the interface between clinical and social psychology is well illustrated by the publication of a number of general texts and journals in this area and the growing

emphasis in graduate programs on providing training in both disciplines Although the benefits of an integrated clinical social approach have been recognized for a number of years the recent work in this area has advanced from the theoretical extrapolations of social psychological models to clinical issues to theory and research that is based on social principles and conducted in clinical domains It is becoming increasingly common to find social psychologists pursuing research with clinical populations and clinical psychologists investigating variables that have traditionally been in the realm of social psychology A major area of interface between the two disciplines is in research and theory concerned with how individuals respond to negative events In addition to the trend toward an integrated clinical social approach the growing body of literature in this area reflects the explosion of current interest in the area of health psychology work by clinical and social psychologists on the topics of stress and coping has been one of the major facets of this burgeoning field The purpose of the present volume is to provide a common forum for recent advances in the clinical and social literature on responses to negative life outcomes

**Power, Politics, and Political Skill in Job Stress** Christopher C. Rosen, Pamela L. Perrewé, 2017-08-31 This volume focuses on the connections between social influence processes broadly defined e.g. power politics political skill and influence and employee stress health and well being Work Stress and Coping Philip J. Dewe, Cary L. Cooper, 2017-05-01

*Work Stress and Coping* the authors provide an historical account of workplace stress taking a broad approach by integrating the macro forces impacting the micro and highlighting what the research in the field tells us about the changing nature of work so that individuals and organisations can create more liveable working environments With an emphasis on the growing influence of globalization the book explores the forces of change within contemporary societies and assesses how they have fundamentally changed the nature of work and the direction of research into stress and coping Capturing the history context critique and transformation of theory into practice the authors offer an insight into how managers and businesses have failed the effects this has had on how work is experienced the evolution and relevance of existing theories and suggest alternative methods and future directions Suitable reading for students of HRM Organisational Behaviour and Occupational Psychology *The Training and Experience of 480 Industrial Arts Teachers*

*Stress, Appraisal, and Coping* Richard S. Lazarus, Susan Folkman, 1984 Here is a monumental work that continues in the tradition pioneered by co author Richard Lazarus in his classic book Psychological Stress and the

Coping Process Dr Lazarus and his collaborator Dr Susan Folkman present here a detailed theory of psychological stress building on the concepts of cognitive appraisal and coping which have become major themes of theory and investigation As an integrative theoretical analysis this volume pulls together two decades of research and thought on issues in behavioral medicine emotion stress management treatment and life span development A selective review of the most pertinent literature is included in each chapter The total reference listing for the book extends to 60 pages This work is necessarily multidisciplinary reflecting the many dimensions of stress related problems and their situation within a complex social context While the emphasis is on psychological aspects of stress the book is oriented towards professionals in various disciplines as well as advanced students and educated laypersons The intended audience ranges from psychiatrists clinical psychologists nurses and social workers to sociologists anthropologists medical researchers and physiologists The Oxford Handbook of Stress, Health, and Coping Susan Folkman, 2011 Few publications have changed the landscape of contemporary psychology more than Richard Lazarus and Susan Folkman's landmark work *Stress Appraisal and Coping* Its publication in 1984 set the course for years of research on the dynamic processes of psychological stress and coping in human beings Now more than a quarter century later *The Oxford Handbook of Stress Health and Coping* pushes the field even further with a comprehensive overview of the newest and best work in this dynamic subject Edited by Susan Folkman and comprising chapters by the field's leading scientists this new volume details the expanded knowledge base that has emerged from extensive research on stress and coping processes over the last several decades Featuring 22 topic based chapters including two by Folkman this volume offers unprecedented coverage of the two primary research topics related to stress and coping mitigating stress related harms and sustaining well being in the face of stress Both topics are addressed within their relevant contexts including chronic illness calamity bereavement and social hardship *The Oxford Handbook of Stress Health and Coping* is an essential reference work for students practitioners and researchers across the fields of health psychology medicine and palliative care Work and Workers Cary L. Cooper, William H. Starbuck, 2005 Collection of essays on the changing nature of work and its components **Developmental Psychopathology, Theory and Methods** Dante Cicchetti, Donald J. Cohen, 1995-05 The first of two complementary volumes on developmental psychopathology a new perspective on mental illness that ties mental disorder to normal development Developmental psychopathology is sufficiently different from older views of mental dysfunction as to be growing as a separate subdiscipline of psychology psychiatry This volume covers the history theory and methods of this new approach including the contributions of several standard theoretical viewpoints psychoanalytic system theory organizational information processing cross cultural etc examines the relationship between developmental psychopathology and genetics neuropsychology epidemiology and ethology and looks at the implications for psychometric theory *Coping, Personality and the Workplace* Alexander-Stamatios Antoniou, Cary L. Cooper, 2017-05-15 How an individual responds to crises and critical incidents at work both immediately and subsequent to

the event is heavily influenced both by personality characteristics and their use of coping strategies. These can in turn be affected by levels of education, gender, and even the profession within which the individual is working. Coping, Personality, and the Workplace offers theory, research, and practice on our ability to cope with dangerous situations, critical incidents, or other work crises. The chapters include perspectives on social and health habits and risks, gender, and age differences, as well as a range of different sources of threat: financial, psychological, and physical, those within and outside the individual's control, immediate and chronic. For organizations, this collection provides help and advice to build into employee safety and support programmes for policy makers, a sense of the emerging sources of risk related to occupational health, and for researchers, an anthology of original applied research from some of the leading authors in three continents.

**The Social Context of Coping** John Eckenrode, 1991-09-30 I am very pleased to have been asked to do a brief foreword to this second CRISP volume. The Social Context of Coping. I know most of the participants and their work and respect them as first-rate and influential research scholars whose research is at the cusp of current concerns in the field of stress and coping. Psychological stress is central to human adaptation. It is difficult to visualize the study of adaptation, health, illness, personal soundness, and psychopathology without recognizing their dependence on how well people cope with the stresses of living. Since the editor John Eckenrode has portrayed the themes of each of the chapters in his introduction, I can limit myself to a few general comments about stress and coping. Stress research began as unexplored fields, often do with very simple, should I say, simplistic ideas about how to define the concept. Early approaches were unidimensional and input-output in outlook, modeled implicitly on Hooke's late 17th century engineering analysis in which external load was an environmental stressor, stress was the area over which the load acted, and strain was the deformation of the structure such as a bridge or building.
