## **Coping With Burglary Research Perspectives On Policy:**

**Coping with Burglary** R.V.G. Clarke, T. Hope, 2012-12-06 This book contains the papers given at a workshop organised by the Home Office England and Wales on the subject of residential burglary This is a topic of much public concern and I welcome the Home Office initiative in mounting the workshop The contributors were all researchers and criminologists who have made a special study of burglary and their brief was to consider the implications of their work for policy As a policeman I find their work of particular interest and relevance at this time when police performance as traditionally measured by the clear up rate is not keeping pace with the increase in the numbers of burglaries coming to police attention The finding that increases in burglary are more reflective of the public's reporting habits than of any significant rise in the actual level of burglary helps with perspective but offers little comfort to policemen The 600 0 increase in the official statistics since 1970 is accompanied by a proportionate increase in police work in visiting victims searching scenes of crime writing crime reports and completing other documentation In some forces the point has been reached where available detective time is so taken up by the volume of visits and reports that there is little remaining for actual investigation But because of the random and opportunist nature of burglary it cannot be said with any confidence that increasing investigative capacity would make a significant and lasting impact on the overall burglary figures The Geography of Crime (RLE Social & Cultural Geography)

David Evans, David Herbert, 2014-01-10 This book presents original research into contemporary geographical aspects of the study of crime The contributors drawn from different disciplines within the social sciences and from various countries give a review of the subject which provides a valuable insight into the geography of crime Their approaches range from the behavioural to the environmental and the crimes dealt with include violent crime and residential burglary The book examines data sources discusses different crimes and ways of studying them and considers the fear of crime The criminal justice system in the UK is examined in detail including policy the operations of community and police committees and an account of the experience of crime prevention policies in Britain and North America is also given Handbook of Crime Prevention and Community Safety

Nick Tilley, Aiden Sidebottom, 2017-03-27 This second edition of the Handbook of Crime Prevention and Community Safety provides a completely revised and updated collection of essays focusing on the theory and practice of crime prevention and the creation of safer communities This book is divided into five comprehensive parts Part I brand new to this edition is concerned with theoretical perspectives on crime prevention and community safety Part II considers general approaches to preventing crime including a new chapter on the theory and practice of deterrence Part III focuses on specific crime prevention strategies including a new chapter on regulation for crime prevention Part IV focuses on the prevention of specific categories of crime and the fear they generate including new chapters on organised crime and cybercrime Part V considers the preventative process the methods through which presenting problems can be analysed responses formulated and implemented and their effectiveness evaluated Bringing together leading academics and practitioners from the UK US

Australia and the Netherlands this volume will be an invaluable reference for researchers and practitioners whose work relates to crime prevention and community safety as well as for undergraduate and postgraduate courses in crime prevention

*Routine Activity and Rational Choice* Ronald V. Clarke, Marcus Felson, 2017-10-23 Two new criminological approaches are defined and applied to categories of crime in Routine Activity and Rational Choice now available in paperback Routine activity analyzes the criminal event and avoids motivations and psychology as topics for discussion whereas rational choice approaches crime as purposive behavior designed to meet the offender's commonplace needs such as money status sex and excitement These conceptual models are both employed to analyze such crimes as drunk driving gun use kidnapping and political violence This volume discusses the relationship of these theories to more traditional approaches to crime studies The Advances in Criminological Theory series encourages theory construction and validation in the articles and themes selected for publication It also furthers the free exchange of ideas propositions and postulates Following publication of the first volume Michael J Lynch of Florida State University asserted that Advances in Criminological Theory is to be applauded as an attempt to revive criminological theory by providing an accessible outlet Contributions to this volume include Pierre Tremblay Searching for Suitable Co-offenders Raymond Paternoster and Sally Simpson A Rational Choice Theory of Corporate Crime Richard B Felson Predatory and Dispute related Violence Gordon Trasler Conscience Opportunity Rational Choice and Crime Ezzat A Fattah The Rational Choice Opportunity Perspectives as a Vehicle for Integrating Criminological and Victimological Theories Patricia L Brantingham and Paul J Brantingham Environment Routine and Situation Maurice Cusson A Strategic Analysis of Crime Richard W Harding Gun Use in Crime Rational Choice and Social Learning Theory

*Routledge Library Editions: Social & Cultural Geography* Various Authors, 2022-07-30 Re-issuing books originally published between 1969 and 1990 this set of 15 volumes gives a 20 year perspective on the development of the discipline of social geography The books emphasize the increasingly important contribution of geographical theory to the understanding of social change values economic and political organization and ethical imperatives The volumes are authored by well known international geographers and discuss the philosophy and sociology of geography as well as key themes such as the geography of health crime space They also examine the cross over of geography with other disciplines such as literature and history

**Crime Prevention** Steven P. Lab, 2023-02-28 Crime Prevention Approaches Practices and Evaluations Eleventh Edition meets the needs of students and instructors for engaging evidence based impartial coverage of interventions that can reduce or prevent deviance This edition examines the entire gamut of prevention from physical design to developmental prevention to identifying high risk individuals to situational initiatives to partnerships and beyond Strategies include primary prevention measures designed to prevent conditions that foster deviance secondary prevention measures directed toward persons or conditions with a high potential for deviance and tertiary prevention measures to deal with persons who have already committed crimes In this book Lab offers a thorough and well rounded discussion of the many sides of the crime

prevention debate in clear and accessible language including the latest research concerning space syntax physical environment and crime neighborhood crime prevention programs community policing crime in schools and electronic monitoring and home confinement This book is essential for undergraduates studying criminal justice criminology and sociology in the U S and globally Online resources include an instructor s manual test bank and lecture slides for faculty and a wide array of resources for students

*What is Criminology?* Mary Bosworth, Carolyn Hoyle, 2012-05-31 Criminology is a booming discipline yet one which can appear divided and fractious In this rich and diverse collection of 34 essays some of the worlds leading criminologists respond to a series of questions designed to investigate the state impact and future challenges of the discipline What is criminology for What is the impact of criminology How should criminology be done What are the key issues and debates in criminology today What challenges does the discipline of criminology face How has criminology as a discipline changed over the last few decades The resulting essays identify a series of intellectual methodological and ideological borders Borders in criminology as elsewhere are policed yet they are also frequently transgressed criminologists can and do move across them to plunder admire or learn from other regions While some boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community In traversing ideological political geographical and disciplinary borders criminologists bring training tools and concepts as well as key texts to share with foreigners From such exchanges over time borders may break down shift or spring up enriching those who take the journey and those who are visited It is in other words in criminologys capacity for and commitment to reflexivity on which the strength of the field depends

Research Bulletin ,1988      **To Have Possessions** Floyd W. Rudmin,1991      **Victims of Crime** Michael R. Gottfredson,1984      Handbook on Crime and Delinquency Prevention Elmer Hubert Johnson,1987-04-21

The Handbook clearly points out that although the literature on crime prevention is voluminous the social conditions that invoke criminality are resistant to social change The articles repeatedly demand a critical evaluation of prevention theories and programs and call for accountability within the crime prevention profession The collection will serve as a valuable resource for policymakers and practitioners as well as for academics The volume includes an excellent directory of crime delinquency prevention organizations and a supplementary bibliography

Choice In recent years the idea of prevention as a means of controlling crime has gained unprecedented popularity Advocates of crime prevention frequently see its proactive nature to be superior to the reactive stance of typical law enforcement Yet major questions continue to arise about what prevention is how it can be carried out to whom it should be directed and where it can best be implemented Elmer E Johnson has drawn together a variety of perspectives in an effort to provide an integrated analysis of fundamental concepts relating to the preventive approach
