Corpse Nature Forensics And The Struggle To Pinpoint Time Of Death:

Corpse Jessica Snyder Sachs, 2013-07-30 When detectives come upon a murder victim there's one thing they want to know above all else When did the victim die The answer can narrow a group of suspects make or break an alibi even assign a name to an unidentified body But outside the fictional world of murder mysteries time of death determinations have remained infamously elusive bedeviling criminal investigators throughout history Armed with an array of high tech devices and tests the world's best forensic pathologists are doing their best to shift the balance but as Jessica Snyder Sachs demonstrates so eloquently in *Corpse* this is a case in which nature might just trump technology Plants chemicals and insects found near the body are turning out to be the fiercest weapons in our crime fighting arsenal In this highly original book Sachs accompanies an eccentric group of entomologists anthropologists biochemists and botanists a new kind of biological Mod Squad on some of their grisliest most intractable cases She also takes us into the courtroom where post O J forensic science as a whole is coming under fire and the new multidisciplinary art of forensic ecology is struggling to establish its credibility *Corpse* is the fascinating story of the 2000 year search to pinpoint time of death It is also the terrible and beautiful story of what happens to our bodies when we die

Clues in Corpses Sophie Washburne, 2017-12-15 When human remains are found at a crime scene forensic anthropologists examine them to determine the time and cause of death as well as the identity of the victim How do they know the answers to these questions Body farms are facilities where specialists can study the ways bodies decompose under different conditions which helps forensic anthropologists solve crimes more effectively Informative fact boxes full color photographs and engaging sidebars offer a closer look at these little known research facilities Readers are sure to be captivated by stories of farms unlike any they have ever heard of before
